12. 20 Ways to Skin a Spell
13. Crones of the Underworld
14. Hydrosapien Neuropathy

Poetry Trail: A Science Art Collision

The Poetry Trail is an outdoor installation featuring 14 poems, inspired by our researchers and technicians, written by award-winning poet Sujatha Menon.

Each poem is inspired by Warwick research and paired with a prologue that reveals the science behind the verse.

You're welcome to visit the poetry posts across campus in our green spaces, in woods and by our lakes. Explore this unique experience blending literature, biology, and outdoor activity.

Follow the QR code to read more about the trail, scientists and poet.

The Poetry Trail was commissioned by the University of Warwick as part of our 60th Anniversary celebrations in 2025.
