Warwick is a leading university, somewhere forward-looking and ambitious, where the starting point is always ‘anything is possible’.

We consistently perform strongly in the UK league tables, and we’re proud to be among the top 20 ‘Most International’ universities in the world*.

We’re as respected for boundary-breaking research as for teaching and business collaborations - our pursuit of excellence and intellectual curiosity is tireless. We strive to lead rather than follow, and are renowned for our entrepreneurialism and cosmopolitan outlook.

We support a diverse and welcoming community, and we want everyone connected with us to thrive and reach their potential. We’re always looking at ways to improve the campus environment to deliver a space that’s both welcoming and enriching.

Projects due to complete in 2018:

The National Automotive Innovation Centre will create and develop novel technologies to reduce dependency on fossil fuels and to cut down CO₂ emissions.

The Mathematical Sciences Building will support our Mathematics, Statistics and Computer Science departments in their work – work that can have a profound impact on our society, our communities and our cities.

The Materials Engineering Centre will create more space for applications-driven, “engineering scale” research into multi-materials and hybrid structures.
The future for campus

Our campus will see investment and development for many years to come, with environmentally-sustainable projects to support every aspect of Warwick life.

The Warwick Arts Centre 20:20 refurbishment and extension project will see the creation of a new art gallery, three HD digital auditoria and more open spaces for eating, drinking and socialising.

The Sport and Wellness Hub will support our vision to have the most active campus in the UK by 2020. It will offer world-class facilities including a sports hall, a flexible swimming pool, fitness suites and climbing walls. Once complete, it will welcome staff, students and the local community.

And there’s more on the horizon, including a new Faculty of Arts Building, and an Interdisciplinary Biomedical Research Building.

REGIONAL AND COMMUNITY ENGAGEMENT.

Our impact stretches far beyond the boundaries of our campus. We engage positively with stakeholders across Coventry and Warwickshire and the wider West Midlands.

**Economic**

Our regional impact study shows that in 2015/16 we generated £1.04bn GVA per year to the regional economy and supported 18,600 jobs across the West Midlands.

We’re committed to supporting economic growth in our region; we’re active in the Coventry and Warwickshire Local Enterprise Partnership and are developing an Innovation Campus at Wellesbourne. Optimised for true collaborative working, we’re inviting inspirational businesses to join us there to develop a suite of knowledge-intensive activities.

**Educational**

We work with hundreds of primary and secondary schools, both encouraging young people (especially from less advantaged communities) to consider higher education, and through teacher training partnerships, arts projects and campus visits.

Warwick Arts Centre’s Creative Learning Programme reached 22,831 people in 2016/17 and more than 300 children from challenging backgrounds attended an aspiration day to introduce them to the world of university.

warwick.ac.uk/community
Our WMG Academies for Young Engineers in Coventry and Solihull are equipping students with technical skills for employment or Higher Education through an innovative learning environment. And we’re working with employers to diversify our degree apprenticeship programmes, enabling higher apprentices to study for a degree while working.

**Cultural/social**

We work in partnership with our local authorities - we are key players in the development of a ten-year cultural strategy for the City of Coventry (2017-2027) and a principal partner of Coventry’s winning bid to become the UK City of Culture 2021.

Warwick Arts Centre is one of the biggest multi-artform venues outside London. On average, we welcome around a million visitors each year to our theatre, dance, music, comedy, and visual arts events and, with our current building improvement project, we aim to double this by 2021.

Our campus sports facilities are used extensively by local schools, clubs and individuals, and we host major national and international sports events.

More than 2,500 of our students are registered with our volunteering network, Warwick Volunteers, and in 2016/17, gave more than 13,000 hours of their time to local schools and community groups.
Working with business is at the heart of what we do. From our inception, Warwick has always had strong connections with industry. The present is no different.

We apply our innovative, cutting-edge research to industry challenges, working with global corporates to SMEs and local start-ups. Our collaborations include:

- Discovering crop protection and plant biotechnology solutions with Dow AgroSciences
- Working with Waitrose to tackle global food security
- Developing the world’s first ibuprofen pain relief patch and launching spin-out company Medherant, based on our research and a productive relationship with Bostik
- Building the National Automotive Innovation Centre with partners Jaguar Land Rover, Tata Motors European Technical Centre and WMG, on our campus.

With the support of Warwick Ventures, Warwick spin-out companies have closed over £25m in the current financial year in investment and grant funding that supports translation of the University’s research into commercial innovations, including £16m into VirionHealth with a novel pan-flu therapeutic.

warwick.ac.uk/business
Businesses can access our state-of-the-art scientific equipment and expertise through Warwick Scientific Services, with 300 investigations carried out last year. Warwick Conferences has expanded its first-class conference and training facilities by adding an innovative 650 sq m flexible space venue on campus, The Slate.

The University of Warwick Science Park has 130 tenant companies employing more than 2,900 staff, and provides facilities for start-ups and established companies. It also manages the Minerva Business Angel Network, and the European Structural and Investment Funds (ESIF)/Warwickshire County Council-supported Business Ready programme.
Monash Warwick Alliance
The Alliance between the University of Warwick and Monash University in Australia is a model that is changing the way universities approach their international partnerships. It’s about co-development, co-publishing and offering a truly transnational experience, with a focus on addressing the global challenges and opportunities of the 21st century.

Strategic global partnerships
We are continuing to develop new international partnerships. All of our activities are underpinned by excellence, be it in teaching or research. Our international partnership funds support our staff to foster such international collaborations.

Warwick in Venice
Our full-time base in Venice provides opportunities for teaching, research and partnership activity.

Non-UK domiciled students: 9,854 from approx. 150 countries
Non-UK alumni: 75,782 living in 197 countries

Our Student Recruitment team visited 66 countries, generating 32,301 applications for study in 2017

OUR GLOBAL PROFILE.
‘Go Global’

Our students have a real chance to stand out in the international world of work and research, gain a global perspective and develop the intercultural skills to be a truly positive force in today’s global society. Students can take part in initiatives including language cafés, cultural events and study, work or volunteering abroad, while our Go Global Ambassadors help to promote intercultural curiosity and integration on campus.

International volunteering

Our students are making a difference through numerous volunteering programmes in the local community and across the world. Through our philanthropically-funded Warwick in Africa and Warwick Laksh programmes, we support maths and English teaching in schools in South Africa, Tanzania, Ghana and New Delhi, India.

Study abroad

We encourage our students to spend time overseas with a work/voluntary placement, or a study abroad opportunity at one of our

200+ partner institutions across 40 countries

Student placements

warwick.ac.uk/about
At Warwick, our teaching and learning is focused on guiding students towards achieving their full potential. We make that happen by deepening the learning of all our students, allowing them to think across subject disciplines, and appreciate the benefits of adopting a student research approach.

We also understand that a healthy mind and body will help our students flourish. So, we ensure teaching and learning goes hand-in-hand with both physical and mental wellbeing. It’s why our campus is a hive of opportunities to stimulate, celebrate and contemplate.

There’s lots happening both inside and outside of Warwick’s fantastic learning spaces, meaning our students learn skills – and enjoy experiences – that enhance their employability once they’ve completed their studies.
Our students realise how our distinctive approach prepares them for the future. We understand that the world’s employers are increasingly calling upon a particular breed of leaders and thinkers, and we nurture students that are prepared to ask difficult questions, and uncover surprising answers.

However, our outlook goes way beyond the boundaries of campus. Studying and teaching at Warwick means being inspired by a community represented by more than 150 nations. And everyone here is encouraged to be outward-looking in their thinking.
RESEARCH.

We’re one of the UK’s leading research universities and the quality and impact of our research is reflected in our rankings. We performed strongly in the most recent Government Research Excellence Framework (REF) 2014:

Warwick ranked 7th overall in the UK (based on multi-faculty institutions).

19 departments are in the UK top ten in their unit of assessment based on outputs.

4 of our departments are ranked as the leading academic department for outputs (publications) in the country.

87% of our research is ‘world-leading’ (3*) or ‘internationally excellent’ (4*)

IMPACT.

Through our research and its impact, we are producing transformative solutions to the multidisciplinary global challenges of today and the future. Our research is changing the world, making lives healthier, safer, more resilient and more fulfilled.

Cultural history of the NHS

Warwick history researchers are examining the cultural history of the NHS, looking at its impacts on communities, and on Britain’s national and international identity. Through a nationwide series of engagement events and an interactive online museum, the team is exploring the answers to questions such as: “How has the popular meaning of the NHS changed since its inception?”, “How has the NHS been perceived by its own staff?” and “Has the NHS changed British identity?”.

warwick.ac.uk/nhshistory
The Story of Children’s Television

Our Film and Television researchers worked with Coventry’s Herbert Art Gallery and Museum to examine the role of children’s television in the formation of memories and nostalgia. They investigated the impact of technology on puppetry and animation, broadcasting history and the influence of the digital age in children’s programming. As part of the project, our researchers curated a hugely popular exhibition telling the story of the central role children’s television has played in UK culture, bringing together decades of memories for people to explore.

Using Instagram to understand human behaviour

Warwick Business School is investigating to what extent we can exploit images from sources such as Flickr and Instagram to develop new indicators of human behaviour and our experience of the world we live in. Using over 1.5m votes from the online game ‘Scenic-or-Not’, researchers demonstrated how online data combined with neural networks can deepen our understanding of what environments we find beautiful and offer insights for policymakers charged with design and protection of our built and natural environments.

warwick.ac.uk/instagramhumanbehaviour
Driving forward intelligent vehicle technology
WMG researchers are working to improve the safety, security and robustness of connected and autonomous vehicles. Their research aims to improve the vehicles’ control and intelligent features, and is supported by one of the world’s most adaptable and advanced driving simulators. This provides a safe environment where rigorous, repeatable scientific evaluations can be conducted. Soon they will also be evaluating and deploying new vehicles, technologies and services in the real-world Midlands Smart Mobility environment, a WMG-led £24m project.

Connecting female African playwrights
A global network of African women creative practitioners – the African Women’s Playwright Network - has been established through a research project led by academics from our School of Theatre and Performance Studies. The team developed a mobile app, used alongside social media to build a network enabling female African artists to promote themselves, collaborate and discuss industry-relevant issues, while at the same time connecting with researchers, programmers and other interested parties on the African continent and beyond.

Investigating early pregnancy loss
Warwick Medical School researchers are working with doctors from University Hospital in Coventry to investigate the causes of early miscarriage. Clinicians at the Tommy’s Early Miscarriage Centre are pioneering research into early pregnancy loss and turning their discoveries into screening tests and treatments. They are sharing their work to inform national clinical guidelines, prevent miscarriages and deliver improved care across the country.

GRADUATE EMPLOYMENT.

- Our graduates are the third most targeted by the UK’s top graduate employers.*
- Warwick is ranked in the top 25 in the world for employer reputation.**

Of our 2015/16 graduates who were available for work:

**Course graduated from:**
- First degree: 92%
- Postgraduate taught: 94%
- Postgraduate research: 96%

(Home and EU, full- and part-time students)***

* The Graduate Market in 2018, research conducted by High Fliers Research
** QS World University Rankings 2018
*** Based on respondents to the Destinations of Leavers from Higher Education survey, carried out six months after successful completion

We want our students to become successful learners and employable graduates. Our Student Careers & Skills team provides:

- 1:1 advice and skills workshops tailored to undergraduate, Master’s and postgraduate research students
- Opportunities to meet employers on campus
- Access to job vacancies and thousands of on- and off-campus work experience opportunities

warwick.ac.uk/careersandskills

STUDENT CAREERS & SKILLS.

- Innovative ways to gain skills and experience, including through our active volunteering programme, Warwick Volunteers, and undergraduate research support scheme bursaries
- Continued careers support after graduation.
Widening participation - raising aspirations, improving access.

We’re committed to enhancing access to higher education for all those who aspire to study at university, regardless of background, and to ensuring that Warwick’s student body is representative of local and national communities.

Financial support for undergraduates - we offer generous financial support through bursaries and scholarships, including the Warwick Scholars Programme.

Enhanced outreach - we support disadvantaged and talented students to progress to higher education through targeted programmes, summer schools and mentoring.

Partnerships - we work with local authorities, schools and colleges, to reach those students who are least likely to enter higher education, including projects supporting looked-after children.

Raising achievement - we’re supporting A level work and teacher CPD through pioneering academic programmes and attainment-raising bootcamps.

Harnessing potential - two innovative schemes, UniTracks and Sutton Scholars, support highly able students aged 12-18 to achieve their potential and enter the most selective higher education courses and institutions.

Access to the professions - we support access to Banking and Finance and Law through two schemes aimed at students aged 14-18, providing opportunities to learn about the study and practice of these professions and gain valuable work experience.

Collaboration - working with 15 leading universities through the national Realising Opportunities programme, to promote fair access and social mobility of students from under-represented groups, aged 16-18.

Innovation - a Foundation Year pathway preparing 25 students for degree-level study at our world-leading Warwick Business School.

warwick.ac.uk/outreach
Our Centre for Lifelong Learning focuses on enabling adult learners to achieve their personal and professional goals by accessing a Warwick education, irrespective of background.

42 students on the Warwick Gateway to HE: Social Studies over the year (April 2017 and Nov 2017)

230 students on 2+2 Degrees (full-time, offered in conjunction with local colleges)

184 students studying on the Foundation Degree programme

74 students on our Part-Time Degree programme

33 students on our BA Hons top-up degrees

Short course programme attracts over 105 registrations over the year

165 students on the Initial Teacher Training programme - FE and Skills Sector
