PREFACE

This book is a product of the Global Economic History Network (GEHN), a global network of scholars that was housed at the London School of Economics from 2003 to 2007 with the financial support of the Leverhulme Trust.

Many of the papers contained in this volume were presented at a GEHN conference on cotton textiles held in Padua, Italy, in October 2005. We would like to thank the University of Padua and the Head of the History Department, Giovanni Luigi Fontana, for their kind hospitality and assistance with that meeting. Our thanks also go to the Fondation des Treilles where a conference on cotton textiles was held in March 2006 and to Tirthankar Roy, the organiser of a second GEHN conference on cotton textiles held in Pune, India, in December 2006. Several of the papers in this book were presented at these venues. We are indebted as well to the International Economic History Association for giving us the opportunity to present the overall results of these conferences at the Helsinki Congress in August 2006. The ‘cotton session’ was organised in collaboration with Kent Deng who we warmly thank.

Andrew Littlejohns, Raffaella Masé and Richard Butler were critical in the preparation of the manuscript and Jackie Pritchard was a superb copyeditor. John Saunders steered the manuscript through the production process with great aplomb. Pat Hudson, Director of the Pasold Fund, was the source of great support.

Finally, we are grateful to the Scouloudi Foundation, the University of Warwick, and Patrick Maney, Dean of Arts and Sciences at Boston College, for the financial support that made possible the reproduction of the images, Kevin Bell, Vice Provost for Research at Boston College, and David Quigley, Interim Dean of Arts and Sciences at Boston College, for funds that financed the compilation of the index, and the Pasold Fund and Leverhulme Foundation for supporting the publication of this volume.

Our journey into the global history of cotton textiles would have not been successful without the support, guidance and intellectual direction provided by Patrick O’Brien, Centennial Professor of Global History at the London School of Economics and Director of the Global Economic History Network. This volume is dedicated to him.
