

Johns Hopkins/Warwick/Warburg summer school in Venice
May 2019

Dr. Caroline Petit (Warwick)

Medicine: a reading list

The bibliography below is highly selective and is simply aimed at providing some background reading in the run up to the summer school. Students should feel free to explore. Highlighted in bold are the titles most likely to provide partial or complete introductions to the themes that will be explored in class.

The history of medicine classes will provide a broad overview of the development of the discipline through cultural exchanges from antiquity onwards, and then focus on some case studies related to the world of knowledge in Venice and the region in the 16th century (examples will include anatomy, botany, pharmacology).
