## Design for Flexible and Online Learning - ABC Mini Sprint

Wednesday 23rd March 10-12 Online

In this session we will be using the ABC 'Sprint' model of design based on Professor Diana Laurillard's 'Conversational Framework' This model will help to structure thoughts and discussions around design in the Technology Enhanced Active Learning Space.

In this session we will:

- Explain what is meant by the ABC 'Sprint' model
- Apply the different learning types
- Consider a range of activities to support the learning aims.

This session will be especially useful for anyone who is planning to deliver online and blended learning. This may be to enhance and develop the configuration of existing content or plan for new delivery. The concepts, ideas and examples will be useful whether you are planning a few sessions or a whole module.
