**Re: Letter of support for Gursharanjit Singh**

To whom it may concern,

I am Gursharanjit's supervisor on his PhD project investigating the coupling between Steam Turbine Last-Stage and Diffuser. The work is of major importance to the power generation industry and is being supported by Alstom. The work involves large parallel computations using a three-dimensional unsteady Navier-Stokes solver, to simulate the flows within this highly complex environment. The HPC Autumn Academy would be extremely helpful for Gursharanjit's project because high performance computing is a critical component of his work.

Gursharanjit is an outstanding student and has made extremely good headway on his project, which started in January this year. He has the research skills and academic ability to make excellent use of the HPC course, and I would give him my highest recommendation.

Yours faithfully,

A handwritten signature in black ink that reads "Andrew Wheeler".

Dr Andrew P S Wheeler
