

OVERCOMING

CHALLENGES TO

CO-CREATION

Lack of consensus on the understanding and practise of Co-Creation

Begin by facilitating open discussion involving all participants

Difficulty diminishing hierarchies and assumed roles

Pay attention to spatial design of classroom, create equal and open spaces e.g circle

Feelings of discomfort moving to new dynamics of teaching and learning

Take time for contemplative practises & self-care, model a beginners mindset & set your intentions to learn

Lack of equal representation, opportunity and inadvertent homogenisation

Account for the limitations of co-creation; create partnerships which capture the diversity of 'the student voice'

Pre-existing assumptions, biases and expectations (from both sides)

Share your vulnerabilities and concerns to encourage a safe, trusting and willing team environment
