

# SYMPOSIUM

## HOW TO MAKE DECISIONS AND INFLUENCE PEOPLE (IN MEDICINE)

Currently, factors impacting patient decision-making in medicine are poorly characterized.

The symposium will showcase research comparing the impact of 4 factors on patient decision-making regarding non-life-threatening medical procedures: medical professionals, self, family and life circumstances.

Additionally, there will be a Q&A with an esteemed panel of experts of the scientific field to discuss the bioethical implications in patient decision-making.

**FREE EVENT OPEN  
TO ALL—RSVP**
