

Johannes Lotz

Fraunhofer Institute for Digital Medicine

- Studied Computational Life Sciences at the University of Lübeck and Emory University in Atlanta
- Joined Fraunhofer MEVIS in 2011, started to work on registration of images from histopathology
- PhD 2019, title "Combined local and global image registration and its application to large-scale images in digital pathology",
- Addressing the challenge that images in pathology are too large to fit into memory such that most numerical optimization methods cannot be directly applied
