

Wouter Bulten

Radboud University Medical Center, Nijmegen, The Netherlands

Wouter Bulten is a Ph.D. candidate in the Computational Pathology Group (CPG) of the Radboud University Medical Center in Nijmegen, The Netherlands. With a background in artificial intelligence, he joined CPG in 2017 to work on deep learning to improve prostate cancer prognostics. He is one of the main organizers of the PANDA grand challenge, a collaboration between Radboudumc, Karolinska Institutet, and Google Health. Other recent work focused on AI assistance in which the possible synergy between AI systems and pathologists is investigated.
