

# James A Diao

Harvard Medical School, Boston, USA

James Diao is a fourth-year MD student at the Harvard-MIT Program in Health Sciences and Technology, supported by the Paul and Daisy Soros Fellowship. His research explores how clinical, genetic, and computational tools can improve health for diverse populations. Previously, he developed algorithms for predicting molecular features from cancer histopathology images at PathAI and for predicting cardiovascular fitness from wearable devices at Apple. He graduated from Yale University with degrees in Statistics & Data Science and Molecular Biophysics & Biochemistry.
