

Korsuk Sirinukunwattana

IBME, University of Oxford, Oxford, UK

Korsuk is a postdoctoral research assistant at the Institute of Biomedical Engineering (IBME), Department of Engineering Science and the Big Data Institute, Oxford University. His main interest is the applications of image analysis and machine learning in medical research. He has been actively involved in several research projects in computational pathology focusing on morpho-molecular correlation and cohort indexing in colon, breast, and prostate cancers. He completed his doctoral research in the group of Nasir Rajpoot at the University of Warwick.
