

Mohamed Amgad Tageldin, MD, PhD

Northwestern University, Chicago, USA

Mohamed Amgad Tageldin is a physician-scientist in training with expertise in computational pathology. He obtained his MBBS degree from Cairo University in 2016, and his PhD degree from Emory University in 2021. His dissertation work utilizes crowdsourcing and machine vision to discover prognostic biomarkers in breast cancer using whole-slide histology images. Mohamed has received the Digital Pathology Association Travel Award, The Association for Pathology Informatics Trainee Award and Best Poster Award, and Emory University's Graduate Research Award. He is an active member of multiple professional societies in pathology and continues to engage with the community through peer review, education, and outreach.
