Paul is a third year PhD student at the Inria Center, Côte d’Azur University (previously Inria Sophia Antipolis), where he is a member of the Epione team. Prior to this, he graduated from the École Supérieure d’Électricité, or Supélec (now CentraleSupélec), in Paris, with a French engineering degree in telecommunications. After an internship at Nokia Bell Labs working on deep learning models for the physical layer, Paul joined the Inria center at Sophia Antipolis to pursue a PhD on biomarker identification for lung cancer immunotherapy response prediction under the supervision of Hervé Delingette and Nicholas Ayache. During his work here, he has mainly focused on annotation-efficient methods for digital pathology, deep clustering algorithms and survival analysis.
