

Sarah Fremond

Leiden University Medical Center, Leiden, Netherlands

Sarah is a 2nd year Ph.D. student at Leiden University medical center, Netherlands, within the gynaeco-pathology research group led by Dr. Tjalling Bosse and in collaboration with the computational and translational pathology lab, USZ Zurich, led by Prof. Viktor Koelzer. Her research topic is using image-based and multi-modal deep learning models on endometrial cancer histology images to predict molecular alterations and prognosis, and to refine prognostication. Previously, she graduated from City, University of London and Paris Dauphine University with degrees in Data Science and Applied Mathematics.
