Dr. Andrew Song

Harvard Medical School, Boston, USA

Andrew Song is currently a postdoctoral research fellow at Harvard medical school, working with Prof. Faisal Mahmood in AI4Pathology group since early 2022. His current research focus is on developing DL-based frameworks for 3D computational pathology, using images from diverse 3D imaging modalities. Before this, he received a Ph.D. from Massachusetts Institute of Technology (MIT) Electrical Engineering and Computer Science (EECS), co-advised by Prof. Emery N. Brown (MIT) and Prof. Demba Ba (Harvard), working at the intersection of computational neuroscience and statistical signal processing.
