

Dr. Lena Cords

Helmholtz Munich, Munich, Germany

Lena Cords is a postdoctoral fellow at the Helmholtz Institute Munich and a fellow of the Helmholtz Munich High Potentials Program 2024-2026. She completed her PhD in Systems Biology in the group of Prof. Bodenmiller at the University of Zurich (UZH) and ETH Zurich in Switzerland, studying cancer-associated fibroblast heterogeneity. She holds a Master of Science degree in Integrated Immunology from the University of Oxford and prior to that a Bachelor of Science in Molecular Medicine from the University of Tübingen (Germany). During her undergraduate studies, she also spent one year at the Karolinska Institutet in Stockholm. Her background is in highly-multiplexed imaging, mainly imaging mass cytometry (IMC), spatial single-cell and single-cell sequencing analysis.
