

# Dr. Mark Eastwood

University of Warwick, Coventry, UK

Mark is a Research Fellow at the Tissue Image Analytics (TIA) center. Initially receiving a BA/MSc in Natural Sciences (focused on Mathematical Physics) from Cambridge University he developed an interest in machine learning which led him to complete a PhD at Bournemouth University. He spent time working in research positions at both Bournemouth and Coventry Universities where his interests included deep learning, and computer vision. At Warwick, he applies machine learning to tissue imaging, focussed on GNN approaches to breast cancer receptor status prediction, causal inference, and virtual tissue re-staining.
