

Dr. Muhammad Shaban

Harvard Medical School, Boston, USA

Shaban is a Machine Learning Scientist at the AI for Pathology Image Analysis Lab, associated with Harvard Medical School. This role follows his completion of over two years of post-doctoral research at the same lab. He earned his PhD in Computer Science from the University of Warwick, focusing on medical image analysis. He has over eight years of research experience in computer vision, deep learning, and AI-driven medical image analysis. His primary focus is developing advanced algorithms for critical clinical applications in computational pathology. For further information, please visit his website at www.mshaban.org.
