Dr Jinxi Xiang

Stanford University, Stanford, USA

Jinxi Xiang is a multidisciplinary researcher specializing in signal processing and machine learning for healthcare applications. He integrated machine learning with medical imaging during his doctoral study at Tsinghua University (09/2016-06/2021). At Tencent AI Lab (07/2021-01/2024), he developed AI tools for clinical pathology using the techniques of image/video coding and multimodal learning. Since January 2024, he has been a postdoctoral researcher at Stanford University, focusing on computational pathology for cancer diagnosis and personalized treatment.
