Dr Nicholas Trahearn

Institute of Cancer Research, London, UK

Nick Trahearn is a Postdoctoral Training Fellow at the Institute of Cancer Research (ICR). Nick began his work in digital pathology as a member of the TIA Centre from 2013-2017, where he was awarded a PhD for his work on serial section registration and multi-IHC analysis. In 2017 he joined the Centre of Evolution and Cancer at the ICR in Sutton, London. Using image analysis and artificial intelligence methodologies, his research during this time has focused upon the question of how aspects of the tumour microenvironment influence tumour evolution and patient outcome. In particular, he is interested in finding relationships between these microenvironmental features and other forms of biological data, such as genomics and multiplex immunofluorescence.
