

# Dr Johannes Lotz

Fraunhofer Institute for Digital Medicine MEVIS, Bremen,  
Germany

Johannes Lotz is the leading the Research Area Digital Biomarkers and Computational Pathology at the Fraunhofer Institute for Digital Medicine MEVIS in Germany, where he works on AI-driven approaches to digital pathology, including foundation models for medical imaging and multi-stain image registration. Johannes also serves as co-chair of the Working Group on Digital Pathology of the German Society of Pathology. The team at Fraunhofer MEVIS has achieved top rankings in multiple MICCAI challenges and is driven by the goal to translate research into real-world clinical applications.
