

Technical questions to consider

1. Is the UI obvious?
 - if not, what is inconsistent with your expectations or what could you not find or do
2. Are the language constructs clear and intuitive to you – if not what might be a better syntax?
3. Did you crash the browser? If so, can you tell us what you did?
4. Did the menu-bar search help you to find documentation? Is this how you would expect to find help (even though it may currently be missing) – or would you expect something else?

General questions

1. What attracted you to today's session? What were you hoping to learn?
2. What extra-curricular activities about making do you do and what draws you to these? Might you use the MCE in these?
3. What similar technologies are you familiar with, and how does the experience of the MCE compare?
4. Can you explain how the objectives for construals differ from those for programs? What's new?
5. Do you think our language and environment support our claimed objectives? If not, what changes would improve your experience?
