LSD exercises

Consider the following everyday scenarios:

1. Playing a game of noughts-and-crosses.
2. Visiting the dentist.
3. Catching a bus from the university campus to the centre of Coventry.
4. Carrying out the room modelling exercise in CS405 Laboratory 1.

For each of these scenarios:

- identify the key agents and observables;
- classify the observables from the perspective of each agent to develop an LSD account.

What artefacts would you need to build in order to support your construal?
