

Wanda Lewis. Principal Investigator, School of Engineering, University of Warwick.

Research areas: 3D structural forms; biomimetics; tension structures; form-finding; stress analysis.

W.J.Lewis@warwick.ac.uk

www.eng.warwick.ac.uk/staff/wjl

Christina Young. Co-Investigator, Conservation & Technology Department, Courtauld Institute of Art, Somerset House, London.

Research areas: deterioration processes in paintings; biaxial tensile testing; measurements by ESPI-Electronic Speckle Pattern Interferometer; development of new artists' materials. Industrial partner: *Heathcote Fabrics*

christina.young@courtauld.ac.uk

www.courtauld.ac.uk/people/young-christina.shtml.

John Brew. Senior Research Fellow, School of Engineering, University of Warwick.

Research areas: non-linear structural analysis; applications of mathematical and statistical modelling to the life, earth, social and physical sciences

Suzanne Jardine. Senior Research Fellow, Conservation & Technology Department, Courtauld Institute of Art, Somerset House, London.

Research areas: biaxial tensile testing of artists' and architectural fabrics; quantifying the visual appearance of textiles.

Simon Carter. Industrial partner: Carter and Son (Thatcham) Reading, Berkshire

Expertise: manufacture of marquees and temporary structures

Research interests: innovative fabric structures; patterning.
