

FAQs for the ENHANCE International Summer Course

1. Who is the ENHANCE International Summer Course designed for?

The ENHANCE International Summer Course is designed for curious minds and aspiring engineers who are passionate about making a real difference in the world through humanitarian engineering solutions. Whether you are an undergraduate student or a postgraduate student, the course welcomes individuals from all backgrounds who have a keen interest in addressing pressing global challenges.

2. What are the themes of the ENHANCE International Summer Course?

The course revolves around essential themes, including climate change, sustainability, energy solutions, waste management, and sanitation. Participants will have the opportunity to dive deep into these subjects and explore innovative engineering solutions under the guidance of expert mentors.

3. Is the ENHANCE Summer Course conducted in-person or virtually?

The ENHANCE International Summer Course is conducted virtually, allowing participants to join from anywhere in the world. The online format breaks geographical barriers, promoting diverse global collaboration and ensuring a rich learning experience right from the comfort of your home.

4. What can participants expect from the ENHANCE learning experience?

The ENHANCE learning experience is engaging and transformative. Participants will engage in interactive sessions, thought-provoking discussions, practical workshops, and immersive simulations. These activities are designed to spark creativity, challenge perspectives, and inspire innovative solutions, honing participants' engineering acumen.

5. Can you tell us about the success of previous ENHANCE alumni?

ENHANCE has a proven track record of nurturing change-makers who have gone on to implement sustainable projects worldwide. Our alumni have created lasting impacts in vulnerable communities, driving positive transformations and making a real difference in the world.

6. Is prior experience in humanitarian engineering required to join the course?

No, there are no prerequisites or prior experience required to participate in the ENHANCE International Summer Course. All that's needed is an open mind, a passion for driving positive change, and a willingness to explore the fascinating realms of humanitarian engineering.

7. How will the course cultivate leadership skills among participants?

ENHANCE believes that true change comes from empowered leaders. Participants will have the opportunity to develop their leadership skills, project management abilities, and teamwork capabilities through collaborative online interaction, forums, debates, self-reflection and goal setting. These skills will provide them with a competitive edge in their future careers.

8. Can you tell us about the global network participants will be part of during the course?

ENHANCE connects participants with like-minded peers and professionals from diverse backgrounds. Collaborating with individuals who share the same passion for humanitarian engineering, participants will forge lifelong friendships that transcend borders, creating a supportive global network.

9. How can I secure my spot in the ENHANCE International Summer Course?

To secure your spot, simply [Express Interest](#) through ENHANCE's website. Our team will contact you with further information. The application process is straightforward, and you'll have the chance to showcase your interest and commitment to driving positive change through engineering ingenuity.

10. How will the ENHANCE course enable participants to make an impact?

The ENHANCE International Summer Course goes beyond being just a course; it's a catalyst for change. Empowered by the knowledge and skills gained during the program, participants will be equipped to implement sustainable engineering projects that create meaningful impacts in vulnerable communities worldwide.
