

Contents

Preface	i
1 Introduction	1
1.1 Operating Systems and Programming Languages	1
1.2 Programming Paradigms	2
1.3 Background on C++	3
1.4 Phases of C++ programming	3
1.5 A Simple C++ Program	6
1.6 Program Frame	8
1.7 Example Problems	9
2 Declaration, Arithmetic Operators and Debugging	11
2.1 Numerical Variable Types	11
2.2 Arithmetic Operators	12
2.2.1 Non-integer division	13
2.2.2 Formatting numerical output	15
2.2.3 Operator precedence order	15
2.3 Mixing Types	16
2.4 Compound Assignment Operations	17
2.5 Errors and Debugging	17
2.6 Example Problems	19
3 Control Structures 1	21
3.1 Operators for Control Structures	21
3.1.1 Relational operators	21
3.1.2 Logical operators	22
3.1.3 Equality operators	23
3.2 Tools for Illustrating Control Structures	24
3.2.1 Pseudocode	24
3.2.2 Activity diagram	24
3.3 Sequence Structure	25
3.4 Selection Structure	26

3.4.1	if statement	26
3.4.2	if/else statement	26
3.4.3	switch statement	27
3.5	Example Problems	29
4	Control Structures 2	33
4.1	Repetition Structure	33
4.1.1	Increment and decrement operators	33
4.1.2	while statement	34
4.1.3	for statement	35
4.1.4	do statement	36
4.2	break and continue Statements	38
4.3	goto statement	39
4.4	Conditional Expression Operator	40
4.5	Example Problems	40
5	Functions	43
5.1	C++ Math Library Functions	43
5.2	Programmer-Defined Functions	44
5.2.1	return type	46
5.2.2	Function prototypes	47
5.2.3	Unused arguments	48
5.2.4	Default arguments	48
5.3	Example Problems	50
6	Types of Functions 1	53
6.1	Recursion	53
6.2	Inline Functions	54
6.3	Scope Rules	55
6.4	Storage Classes auto and static	57
6.5	Overloading a Function Name	58
6.6	Example Problems	59
7	Types of Functions 2	63
7.1	Function Templates	63
7.2	C++ Standard Library	65
7.2.1	Header files	65
7.3	An Example of Library Functions	66
7.4	Example Problems	68

8	Arrays	71
8.1	Array Declarations	71
8.2	Initialisation of Arrays	72
8.3	Using Array Elements	73
8.4	Arrays and Functions	74
8.5	Example Problems	77
9	Pointers 1	79
9.1	Pointer Variables	79
9.1.1	Pointer as an alias	80
9.1.2	A pointer to pointer	81
9.1.3	Comparing pointers	81
9.2	Pointers and Arrays	81
9.2.1	Pointer arithmetic	82
9.2.2	A pointer to an array	82
9.2.3	Pointer as alias of array name	83
9.2.4	An array of pointers	84
9.3	Example Problems	85
10	Pointers 2	87
10.1	Pointers As Function Arguments	87
10.1.1	Function with non-array arguments	87
10.1.2	Function with array elements	88
10.2	Multi-dimensional Arrays	89
10.2.1	Pointers and multi-dimensional arrays	92
10.3	Example Problems	95
11	Reading and Writing	97
11.1	Precision of Outputs	97
11.2	Formatting Spacing in Outputs	98
11.3	File Input/Output	100
11.4	Example Problems	103
12	Strings and Enumerated Data Types	105
12.1	Strings	105
12.1.1	Declaring a string	105
12.1.2	Using string arrays	106
12.1.3	C++ functions for manipulating strings	107
12.1.4	Using pointers to declare strings	108
12.1.5	Reading and printing strings	109
12.2	Enumerated Data Types	111

12.3	Example Problems	112
13	Structures	115
13.1	Declaring a structure	115
13.2	Operations on Structure Members	116
13.3	Structures as Members of Another Structure	118
13.4	An Array of Structures	118
13.5	Another Example of a Structure	119
13.6	Recursive Structure Definition	120
13.7	Example Problems	121
14	Dynamic Memory 1	123
14.1	Dynamic Memory Allocation	123
14.2	Dynamic Memory De-allocation	124
14.3	Exception Handling	126
14.4	Garbage and Memory Leaks	128
14.5	Example Problems	129
15	Dynamic Memory 2	131
15.1	Dynamic Memory Allocation in Matrix Multiplication	131
15.2	Dynamic Memory Allocation in Strings	134
15.3	Example Problems	136
16	Classes	139
16.1	Declaring Classes	139
16.2	A Class complex	141
16.3	Example Problems	145
17	Classes and Functions	147
17.1	Objects of a Class	147
17.2	Static Data Members of a Class	148
17.3	Static Member Functions of a Class	149
17.4	Friend Functions	151
17.5	Stream Classes	152
17.6	Example Problems	153
18	Single Inheritance	157
18.1	Derived Classes	157
18.2	Virtual Functions	160
18.3	Abstract Classes and Pure Virtual Functions	162
18.4	Example Problems	164
