|---------|---|---------|
| 1B | Highly modular system, designed with users in mind, however possible antagonism for user with cameras in every room. Wireless system possibly overkill for solution, and costings are quite likely under for call centre. | 7 |

|---------|---|--------------------|
| 1B | Very expensive to start with, they may still require nursing care. Costs do not seem to incorporate 24/7 operator availability. Very reliant on one piece of technology with no redundancy | 7 10 |

For the group that you review, please give a brief comment on their overall presentation/design/solution and a grade out of 10 in the table below.

| 1B | Generally, solid idea, a bit expensive for a person who isn't too well off. Seems to be quite complicated for an old person. | 8 |
