A	Well presented and effective solution, clear solution (maybe a bit unrealistic due to intrusive components) but good idea. Budget realistic but no running costs (maybe just too low to quote). Overall very good.	8/10

2A	<ul style="list-style-type: none"> Very good presentation, some really great ideas very clear solutions. Very realistic overall design, off the shelf components readily available. Not included running cost, but the cost is very realistic. 	9

2A	knew Exactly what to talk about. Very knowledgeable in information. Solution was very clear Very Realistic with good ideas - off the shelf components were available Realistic Budget for installation but No Running Costs.	8

2A	had some very interesting ideas and answered questions about the solution very well. The solution seems well clearly explained but had a few little niggles but could be very intrusive to the person. need to look at data system with accelerometer as it only detects tilt of device. no running costs in costs. but on the whole very well done.	8/10.
