2C	The solution generally clear from the overall concept design slide. Quite good idea with realistic overall design. However, the solution is not very wide, concentrate to several fields. And the budget of £40,000 is a little high.	8

2C	product lacked any effectors, but good alarm efficiency	7/10
----	---	------

2C	Confident at presenting. Some slides had small font & too much detail. Very high total cost price	8

2C	Advantages: Clearly; not many details; fit fluently; etc economic. disadvantage: not not do not not solve power failure; use too much time on presentation.	7/10

2C	Design was realistic although "retro-fitting" may have not been easy. All components introduced were off the shelf and easily available. Budget was well justified.	8
----	---	---

→ The system didn't appear particularly easy for an elderly person to get to grips with

2C	Presented well, Comprehensive in providing solutions but not too clear on how they all fit together (processing computer system etc. Components seem realistically available. Budget well thought out but £14k seems rather high	7
