zpentomino@gmail.com/George.Kontogeorgiou@warwick.ac.uk

I am a mathematics PhD student at the University of Warwick. I am mainly interested in discrete mathematics and graph theory.

Education

2019-

- PhD in Mathematics, University of Warwick

2015-2019

- BSc in Mathematics, National and Kapodistrian University of Athens
 - 4-year degree, 246 ECTS
 - Mark: 9.69/10, Excellent
 - Direction: Pure Mathematics
 - Thesis: *A proof of the (1,2g)-self-duality of branchwidth*

2015

- Nationwide University Entrance Examination Score: 19,079/20,000

Research

My chief interest is graph theory, especially its interface with topology and geometry. I enjoy working on problems in structural and topological graph theory.

I also enjoy enumerative combinatorics and discrete algorithms.

Publications

2. Czumaj, A., Kontogeorgiou, G., & Paterson, M. (2021), Combinatorial Communication in the Locker Room, ICALP 2021

1. Kirousis, L., & Kontogeorgiou, G. (2018). 102.18 The problème des ménages revisited. The Mathematical Gazette, 102(553), 147-149. doi:10.1017/mag.2018.27

Honours and Awards

2019

- International Mathematical Competition (IMC), silver medal

2017

- South Eastern European Mathematical Competition for University Students (SEEMOUS), silver medal

Funding

2019-

- EPSRC Doctoral Training Partnership Award
- Mathematics Department of the University of Warwick maintenance stipend

Teaching

2019-2021

- TA for the following classes (followed by number of times that I taught them):
 - Combinatorics (x 2)
 - Graph Theory (x 1)
 - Discrete Mathematics and its Applications I (Department of CS) (x 1)
 - Discrete Mathematics and its Applications II (Department of CS) (x 2)
- Delivered preparatory lectures for the IMC competition to the University of Warwick team. Was the team's deputy leader in IMC 2020 and IMC 2021.

2017-2019

- Delivered preparatory lectures for the SEEMOUS competition to the University of Athens team.

Miscellaneous Skills

- Languages: English (fluent), French (intermediate), Spanish (basic), Greek (native)
- Programming Languages: C++, Java, Python, MATLAB, Visual Basic
- Software Tools: LaTeX

Talks

2021

- Equivariant Cayley Complex Embeddings – YGGT
- Haystack Hunting Hints and Locker Room Communication – ICALP
- Combinatorial Communication in the Locker Room – YRM

2020

- Yet Another Locker Problem – Warwick Mathematics Postgraduate Seminar 2019
- Bidimensionality: What's It Good For? - Warwick–Imperial Autumn Meeting

Conferences & Schools

2021

- YGGT
- ICALP
- BCC
- YRM
- Polytopics

2020

- Probabilistic Combinatorics Online

2018

- Introduction to graph limits - Eötvös Loránd University Summer School in Mathematics
