

Combinatorics Seminar

Friday February 1, 2013 at 2PM

Room B1.01

Andrzej Grzesik

(Jagiellonian University, Krakow)

Flag algebra calculus

During the talk I will present basic definitions and intuitions related to flag algebras, which gives a very powerful tool in Extremal Combinatorics. I will also prove some theorems using this technique.

**There will be refreshments for the attendees.
Please bring your own mugs (for coffee/tea) if possible.
Everyone is welcome.**
