Dear

We hope you’re well. It’s just a few more weeks until Welcome Week and the start of your course, and there’s some more information we wanted to share with you to help prepare you for your studies.

**Refresher Mathematics**

Before you arrive, we are providing a core module for you online, called Refresher Mathematics. This course will go over the mathematics from you’re A-levels that we think is essential to be on to of for our degree and you may be either rusty, or not have covered all of it due to Coronavirus disruption earlier in the year. This course will go live on September 7th, and we will be in touch about it shortly, but once live it will be found at [http://www.warwick.ac.uk/ma1k2](http://www.warwick.ac.uk/ma1k2) and details will also be placed on the Maths induction pages. There will be some assessment involved to give you feedback on how prepared you are, but don’t worry, this assessment will not contribute any credit to your degree.

**Support with your studies**

Together with colleagues across the University, we are committed to supporting your academic success and professional development. We have a range of support available for you to use both within the Mathematics Department and the wider University.

The Library offers a range of study spaces as well as subject specific resources. You can find out more on the Get Started pages and during the Library Induction in your first week.

**Timetabling and module registration**

All of your Welcome Week activities are available in the Welcome Week Timetable, but for the rest of your time at Warwick, you’ll use a system called Tabula to view your personalised course timetable.

To start with, you’ll only see your core sessions. You’ll then receive a separate email with guidance on module registration and selection where there are optional modules for your degree. We recommend that you wait until Welcome Week before making module choices, we will guide you through the process and what’s available during the Welcome Week induction sessions. Once you have made your choices your Tabula timetable will then be updated to reflect this.

**Student Bloggers**

To help find out more about what’s in store at Warwick, why not catch up with our student blogs.

**Personal Tutor**

In week 1 (commencing Monday 5 October) you will be assigned your personal tutor who, for most students, stays with you throughout your degree and is your point of call for any academic or welfare support.
What’s next?

- If you haven't done so already, don't forget to enrol and register for your ITS account. You can do this on the warwick.ac.uk/welcome website
- Check the welcome week activities and timetable. Your core activities from Maths will be automatically populated there.
- Check the Maths induction pages for pre-arrival information and some pre-reading if you’re keen. We will assume that you have read through these pages before you arrive.
- Contact Student Disability Services if necessary

We look forward to seeing you soon. If you have any questions in the meantime please contact us at: ugmathematics@warwick.ac.uk

Kind regards

Dr David Wood
Director of Undergraduate Studies
