Key individuals in Warwick Medical School who can propose Honorary Associates:

Any academic employee of WMS can propose Honorary Associates. This list suggests some key WMS contacts particularly for colleagues in the NHS who provide clinical teaching, but it is not an exhaustive list.

As a first point of contact, speak to the person who is in charge of the clinical teaching that you do. If you cannot identify the right person, make contact with someone who knows the course that you are involved with, for example, the MBChB phase lead. This person will normally know what you do and can support your application for an Honorary Association. You will need to request their approval for you to put their name on the nominee form that you complete (see http://www2.warwick.ac.uk/fac/med/about/honoraryassociations/)

If someone is listed in pale grey below, this means that they are themselves an honorary associate. You should still make contact with them in the normal way but they may identify a colleague to propose you instead.

Contact details are all available on the WMS staff list at: http://www2.warwick.ac.uk/fac/med/staff/ or call University switchboard on 02476 523523.

If you are involved in research, your research collaborator or co-supervisor is normally your first point of contact.

Education

MBChB Phase Leads and Block Leads:

Anne Green (Phase I lead)
Olanrewaju Sorinola (Phase II lead)
Paul DeCates (Phase III lead)

Anne Green (Block 1 lead) (Health Metabolism and Homeostasis)
