DRAFFT
Distal Radius Acute Fracture Fixation Trial

A randomised controlled trial of percutaneous fixation with Kirschner wires versus Volar locking-plate fixation in the treatment of adult patients with a dorsally displaced fracture of the distal radius.

Warwick
Medical School
CLINICAL TRIALS UNIT

Amendment Approval

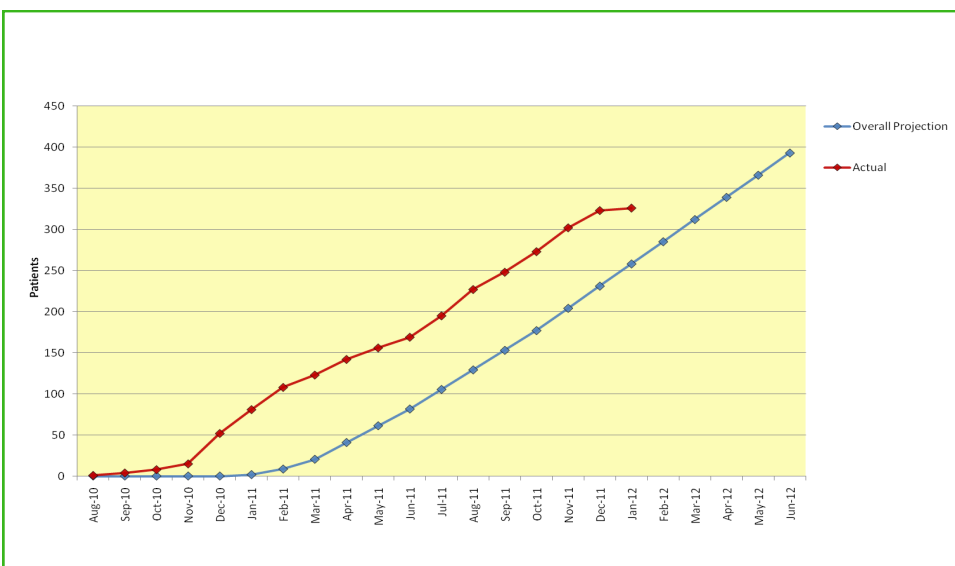

Ethics approved **substantial amendment 3** on 7th December 2011. This allows us to continue recruiting beyond the original 390 participant target to the end of June 2012.

All R&D departments have been made aware of the amendment via CSP and all centres should now be working to **version 3** of the protocol.

Recruitment Update

In December we recruited **21** patients and by the end of the month had a total of **323** participants.

Well done to the team at **Wansbeck** for recruiting a total of **5** patients and congratulations also for recruiting the first patient of 2012.

Centre Progress

Centre	PI	Status	Total Recruited	Recruited in Dec
UHCW	Miss Edwards	Recruiting	85	2
Ipswich	Mr Roberts	Recruiting	18	0
