20 April 2020

Dear Study Team,

**‘RECOVERY - Respiratory Support’ - IRAS ID: 282338 / CPMS ID: 45518**

Please find this letter as confirmation that individual site targets, as set out in the mNCA, for the above study will be amended on the Portfolio ([CPMS](#)) to reflect the actual site recruitment figure at study closure. Individual site targets need to be set at the start of the study for purposes of performance monitoring during the running of this study, however, it is the overall study sample size and combined recruitment across *all* sites the NIHR CRNCC is concerned with. The NIHR CRNCC will therefore amend individual site targets to reflect the number of participants actually recruited at each individual site once the study has closed to recruitment; therefore there won't be implications if sites don't recruit the figure stated in the mNCA. Sites are therefore requested not to negotiate site recruitment targets.

Kind regards,

Davina Munday  
Research Delivery Coordinator
