

IRAS ID: 227966

A Feasibility Randomised Controlled Trial to compare REgional versus General Anaesthesia in Reducing Delirium in patients with Hip Fractures (REGARD)

DATA TRANSPARANCY STATEMENT

The University of Warwick is the sponsor for this study based in the United Kingdom. We will be using information from you and your medical records in order to undertake this study and will act as the data controller for this study. This means that we are responsible for looking after your information and using it properly. The University of Warwick will keep identifiable information about you for a minimum of 10 years after the study has finished.

Your rights to access, change or move your information are limited, as we need to manage your information in specific ways in order for the research to be reliable and accurate. If you withdraw from the study, we will keep the information about you that we have already obtained. To safeguard your rights, we will use the minimum personally-identifiable information possible.

You can find out more about how we use your information here:

<https://warwick.ac.uk/services/idc/dataprotection/privacynotices/researchprivacynotice>

Your hospital will collect information from you and your medical records for this research study in accordance with our instructions.

When you agree to take part in a research study, the information about your health and care may be provided to researchers running other research studies in this organisation and in other organisations. These organisations may be universities, NHS organisations or companies involved in health and care research in this country or abroad. Your information will only be used by organisations and researchers to conduct research in accordance with the [UK Policy Framework for Health and Social Care Research](#).

This information will not identify you and will not be combined with other information in a way that could identify you. The information will only be used for the purpose of health and care research, and cannot be used to contact you or to affect your care. It will not be used to make decisions about future services available to you, such as insurance.

Your hospital will keep your name, NHS number, hospital number and contact details confidential and will not pass this information to the University of Warwick. Your hospital will use this information as needed, to contact you about the research study, and make sure

IRAS ID: 227966

that relevant information about the study is recorded for your care, and to oversee the quality of the study. Certain individuals from the University of Warwick and regulatory organisations may look at your medical and research records to check the accuracy of the research study. The University of Warwick will only receive information without any identifying information. The people who analyse the information will not be able to identify you and will not be able to find out your name, NHS number, hospital number or contact details.

The University of Warwick will collect information about you for this research study from your hospital medical records. This information will include your date of birth, initials, gender and health information, which is regarded as a special category information. We will use this information to better design future research and improve patient care after hip fracture.

Your hospital will keep identifiable information about you from this study for minimum of 10 years after the study has finished.
