

# SOS Trial Training Matrix

The training material outlined below is of relevance to you if you have not received full protocol training (i.e. attended an SIV session or received full SIV slide training from a trained colleague). If you have already received full protocol training, you do not need to repeat the training listed below.

The below table provides an overview of the training materials that need to be completed based on your trial role.

All training materials can be found on the [SOS trial webpage](#) or requested from the [trial team](#).

You can also check whether you need to sign the trial delegation and/or training log by viewing the [SOS sign-off requirements document](#).

Key:

Training mandatory for role	Training mandatory if not GCP trained	Training optional
-----------------------------	---------------------------------------	-------------------

SOS trial role	Protocol training material (regardless of if you are GCP trained)					Targeted training - mandatory for those not GCP trained					Full SIV slides
	Trial background and training requirements	Consent training	Randomisation and trial interventions	Generic login for randomising	Safety reporting and data collection	Screening and eligibility	Prescribing IMP	Informed consent	Data collection	SAE causality assessment and sign-off	
Screening											
Confirming Eligibility											
Performing randomisation using individual login											
Performing randomisation using generic login *											
Prescribing mannitol/hypertonic saline											
Administering IMP											
Taking informed consent											
Data collection/queries											
SAE reporting/assessment											

*\*If you have completed the generic login for randomising training, please ensure you complete the online self-certification form (available below the training slides) in order to be authorised to have your site's generic login details.*
