

Thank you for taking part in the SWEET (HT&Me) study

SWEET is testing a support package (HT&Me) to help women keep taking their hormone therapy after breast cancer, and to improve their quality of life.

Everyone gets a questionnaire at the start of the study and again 6, 12 and 18 months later. It's important that women in both study groups (those getting HT&Me and those getting usual NHS care) fill in these questionnaires.

This will help us see if HT&Me is useful and should be available on the NHS to help women in the future.

It should take about 20–30 minutes to complete.

Thank you!
