

# Sleep, Health, and Society

FROM AETIOLOGY TO PUBLIC HEALTH

Edited by

Francesco P. Cappuccio, Michelle A. Miller,  
Steven W. Lockley, and Shantha M. W. Rajaratnam

*Second edition*

Paperback | 9780198778240

May 2018 | 272 pages

£34.99 **£24.49**

New to this Edition:

- New data and research
- Updated core chapters
- Chapters on Sleep and cognition, Sleep and epilepsy, Sleep and anti-cancer treatments, and much more

Sleep disturbances and sleep deprivation are increasingly common in modern society. Epidemiological methods of investigation have shown that sleep deprivation is associated with a variety of chronic conditions and health outcomes. Sleep medicine is a rapidly growing field of clinical research, affecting people across their lifespan.

The new edition of *Sleep, Health, and Society* is fully updated, and provides a wealth of information on recently discovered areas of sleep medicine. New additional chapters explore eating patterns, nutrition, pregnancy, cancer, pain, and CBT in relation to sleep, making it an invaluable resource for respiratory physicians, neurologists, cardiologists, and psychiatrists alike.
