Director's Message

We have had a very exciting and successful year for publications, grants, impact and PhD supervision. Staff have continued to focus on producing high quality research that is relevant to nursing. We continue to work collaboratively with academics, patients and carers, and health care professionals both nationally and internationally to ensure our research makes a difference.

However, changes are now afoot. We submitted a tender to continue our Strategic Alliance for Research with the Royal College of Nursing (RCN) for the next 5 years. Following a pre-qualifying questionnaire first submitted in May 2016 we were shortlisted. We submitted the tender in March 2017 and were invited for interview in May 2017. We were notified that we were not successful with this tender and it has been awarded to another organisation. We will thus no longer be the RCN Research Institute after 31st July 2017, so this is our last Annual Report as the RCN Research Institute. Our Joint Advisory Board, which was set up to advise on scope, direction, and monitor the Strategic Alliance will now be disbanded. I would like to thank all members of our Joint Advisory Board for their time, support and constructive suggestions. Professor Celia Davies, the Chair of our Joint Advisory Board has been incredibly supportive during this whole process and has our special thanks for her wise counsel. We will also be losing our administrator Paul Kent, who after ten years with the RCN Research Institute will be starting a new job elsewhere in the University in July 2017.

We are very positive about our future. We now have opportunities for new directions and new partnerships and are working hard to obtain funding from other sources. We will stay as a research group that undertakes research relevant to nursing. Our new name will be "Warwick Research in Nursing." We will still produce our Annual Report, and will continue with a regular newsletter. We have been very well supported by Warwick Medical School, and I would like to thank Professor Aileen Clarke, Chair of Faculty; Professor Frances Griffiths, Head of Division and Professor Sudhesh Kumar, Dean, for all their support and trust in us at this time of change. I would also like to thank all the RCN Research Institute staff for their support and good humour whilst continuing to focus on their research during what has been an unsettling and uncertain time.

We are very proud of everything we have achieved over the last 10 years, and look forward to continuing to produce leading edge, high quality research relevant to nursing.

Professor Kate Seers
Director, RCN Research Institute

July 2017

Summary of Progress 2016-2017

Ongoing Research

The Royal College of Nursing Research Institute (RCN RI) research is focused on understanding and improving care. We have four research themes: patient and public involvement; experiences of care; patient reported outcomes and translating knowledge into practice. Our website has more details: <http://www2.warwick.ac.uk/fac/med/research/hscience/rcn/research>.

Publications

The RCN RI team has been very productive over the past year. We have had 46 publications in 2015-2016. Our work remains highly cited, which is rewarding.

Grants

We have been successful in generating research grant income, with nine externally funded grants running during the period of this report. We continue to work collaboratively on grant applications nationally and internationally, and health professionals and users of services are important collaborators on these grants.

Measures of Esteem

Members of the RCN RI have a variety of measures of external esteem, including editors and editorial boards of journals, invited plenary lectures, invited national and international scientific committees, contribution to national policy initiatives and contribution to the academic community via external examining, especially at PhD level.

PhD Students

We have had an interesting year, with our PhD students making good progress. We have one student who has submitted this year and is awaiting her viva, and we are anticipating that three of our students will complete their PhD over the coming year.

Strategic Alliance

The strategic alliance between the RCN and the University of Warwick has been strong, and we are now working with new people in post, Dame Donna Kinnair and Stephanie Aiken, to continue to develop our strategic alliance, maximising the opportunities for collaboration. The progress of the strategic alliance is reviewed by our Joint Advisory Board.

Newsletter

Our newsletter continues to be published quarterly. It provides key messages from our activity and is disseminated widely as well as being on our website. We know it is read as we often get comments and requests for more details.

Contribution of RCN RI to the University

The RCN RI contributes to the University in many different ways. Professor Seers is lead for research in the Division of Health Sciences for research strategy and impact and a member of the Divisional Strategy Group. She also is leading on embedding mentorship and career development both within the Division and more widely across the Medical School. She is on the University's Athena-SWAN working group. She co-founded and runs the Women's Academic Network for the Medical School which meets three times a term. She is an elected member of the Board of the Faculty of Medicine and Board of the

Faculty of Social Sciences and a member of the Warwick Medical School Research Committee. She undertakes both a coaching & mentoring and a mediation role on behalf of the University. She is now academic lead for the University shadowing scheme which she initiated. She is also working with WMS to ensure revalidation for nurses is appropriately supported. Dr Staniszewska is a member of the Advisory Group for Global Prioritise Programme (Health and Technology), a member of the Impact Acceleration Committee and a member of the cross University Public Engagement Committee. Mr Kent is a Fire Marshall and volunteer with the WMS Incident Response Team. The RCN RI staff also contributed as supervisors of PhD students, members of MPhil to PhD upgrade panels, PhD exam advisors and internal examiners of PhDs. We also organise and contributed to research surgeries, journal clubs and Research and Development seminars.

Contribution of the University to the RCN RI

The University of Warwick is a world class university. It has an outstanding performance in national and international rankings. Nationally it is ranked 6th in The Times and The Sunday Times (2016) and 6th in The Guardian (2016) rankings. It is 8th in The Complete University Guide (2016). It is the 45th most international university in the world (Times Higher Education 2016), 51st in the world - QS World University Rankings (2016) and 9th young university globally - Times Higher Education 100 under 50 rankings (2015). It is also the 3rd fastest-rising young university in the world - Times Higher Education, (2015). The University of Warwick is one of the top ten most targeted universities by the top graduate employers according to the High Fliers Report 2014. The results of the 2014 Research Excellence Framework (REF) reiterate Warwick's position as one of the UK's leading research universities, with 87% of Warwick's research 'world-leading' or 'internationally excellent'.

RCN RI staff can access an extensive programme of training and development within the University and a diverse programme of seminars and other lectures. There are also many opportunities for collaboration with colleagues from a variety of departments.

Reciprocal Relationship between RCN RI and Royal College of Nursing

Staff have helped develop the strategic alliance in partnership with the RCN, contributing to building an authoritative body of knowledge relevant to nursing and having a national and international profile for research relevant to nursing. We work closely with RCN staff and members on a number of issues relevant to the RCN. We attend away days at the RCN and contribute to responses to a range of governmental and other reports received by the RCN. We also attend events on behalf of the RCN and support staff on agreed projects where appropriate.

Leadership

Creating a place where people want to come to work and where they can flourish is very important to us. Respecting and valuing staff are key underpinning principles for us. We are committed to promoting leadership across all levels, and several staff have been on leadership courses to enable this to happen. We believe that strong strategic leadership and mentoring underpins the effectiveness and culture of the RCN RI.

Conclusion

The RCN RI remains at the cutting edge of knowledge generation, undertaking research that is relevant to nursing. Our highly cited publications and our indicators of peer esteem suggest that our contributions are valued by a wide range of those external to the University. We are committed to continuing to develop research capacity that can underpin the development of nursing. We are delighted to continue and build on the very constructive strategic alliance between the RCN and the University of Warwick.

Oct 2016	Academic Health Science Network Conference, Newcastle Keynote speaker - The role of patients and the public in the implementation of evidence	Sophie Staniszewska
	Brocher Foundation International Symposium, Geneva 'Patient and public involvement in research in the UK.'	Sophie Staniszewska
Nov 2016	RCN Centenary Conference, London Symposium - Knowledge for change and improvement: developing partnership through involving and engaging others: <ul style="list-style-type: none"> • Knowing - patient and staff experience • Involving - how we involve patients and carers • Influencing - how we use evidence to influence policy • Engaging - how we make sure what matters to patients is measured • Changing - how we use evidence to examine and change our practice 	Kate Seers Sophie Staniszewska Kirstie Haywood Liz Tutton Steph Tierney Carole Mockford
Nov 2016	Patient Experience Conference (Healthcare Events) Implementing the Warwick Patient Experience Framework	Sophie Staniszewska
Nov 2016	ATOCP Wolfson College, Oxford. Plenary - Improving recovery and rehabilitation: learning from patient experience	Liz Tutton
Nov 2016	University of Leicester Department of Health Sciences Annual Conference. Keynote Presentation - Patient and public Involvement: Developing the evidence base	Sophie Staniszewska
Nov 2016	American Heart Association/Resuscitation Science Scientific Session, New Orleans Keynote speaker - Long-term outcomes: What matters to Patients? Patient-centred Outcomes After Cardiac Arrest	Kirstie Haywood
Dec 2016	AStretch: Management of Axial Spondyloarthritis, Birmingham Defining a Flares in Ankylosing Spondylitis: the patient's perspective	Kirstie Haywood
Dec 2016	PPI and Outcomes Workshop. Oxford Invited Speaker - Patient and Public Involvement in Patient Reported Outcome Measures	Kirstie Haywood

Jan 2017	NIHR Clinical Research Network, Celebrating Trauma Research in the Thames Valley, Reading Paper - Understanding informal carers' experiences of caring for older people with a hip fracture: a systematic review of qualitative studies.	Liz Tutton
Jan 2017	5th NIHR Musculoskeletal Trauma Trials Annual Meeting, University of Warwick. Plenary - Patient and carer experience and involvement in research	Liz Tutton
Apr 2017	RCN International Nursing Research Conference, Oxford Flow of compassion in healthcare: moving beyond an individual towards a systemic focus. Exploring the assessment process on a ward for older people: a constructivist grounded theory Paper - Understanding informal carers' experiences of caring for older people with a hip fracture: a systematic review of qualitative studies	Kate Seers Sophie Staniszewska Kirstie Haywood Liz Tutton Steph Tierney
Apr 2017	British Society of Rheumatology, Birmingham Symposium: Flares in Ankylosing Spondylitis	Kirstie Haywood
May 2017	British Pain Society 50 th Anniversary ASM, Birmingham Plenary Paper: A mega-ethnography of eleven systematic reviews of qualitative research exploring the experience of living with chronic pain Poster - Improving the wellbeing of people with opioid treated chronic pain. The i-wotch study. Poster - Developing a complex multimodal self-management behaviour change intervention; theories processes and materials.	Kate Seers
May 2017	International Council of Nurses, Barcelona Presenting in plenary session for roundtable Paper: Nursing Innovation and Research	Kate Seers
Jun 2017	Measuring the impact of patient and public involvement Conference, Newcastle University	Sophie Staniszewska
Jun 2017	Health Technology Assessment Annual meeting, Rome Three presentations on patient-based evidence, proms and PPI in vaccination modelling	Sophie Staniszewska
Jul 2017	HSRUK Symposium 2017, Nottingham	Steph Tierney

Health Sciences Division Seminars 2016/2017

Date	Speaker	Title
5 Oct 16	Dr Kate Owen	Case Based Learning: the WMS experience
12 Oct 16	Dr Sara Hattersley	Digital publishing academia
PhD Showcase 19 Oct 16	Mike Smyth	Pre-hospital recognition of sepsis by ambulance clinicians
2 Nov 16	Prof Victor Zammit	How we know when we've had enough
9 Nov 16	Prof Sir Mark Levine	Chronicles of a Clinician Investigator: What Have I Learned?
16 Nov 16	Prof Charles Hutchinson	'INSPIRE' - Encouraging medical students into research
23 Nov 16	Dr Carly Craddock	National Institute for Health Research Clinical Research Network - an overview of services
30 Nov 16	Prof Ann Blandford	Designing to support self-care at home
7 Dec 16	Dr Martine Barons	Working with local government to reduce hunger: networking information to provide decision Support
PhD Showcase 18 Jan 17	Ms Hanneke Wiltjer	Exploring the assessment process on a ward for older people: a constructivist Grounded Theory
25 Jan 17	Dr Chanuki Seresinhe	Quantifying the impact of scenic environments on our health and happiness
1 Feb 17	Dr G J Melendez-Torres	Complex interventions and empirically derived component classes in a network meta-analysis of parenting interventions for child conduct disorder
8 Feb 17	Edward Gardiner	Supporting collective action to improve our health and wellbeing

15 Feb 17	Prof Anthony Maraveyas	Venous Thromboembolism and Cancer
1 Mar17	Prof James Thomas	Automation in systematic reviews: what we can do now, and what we (may) be able to do in the future
8 Mar 17	Prof Sam Ahmedzai	"NICE way to care in the last days of life: evidence, guidelines and clinical practice"
15 Mar 17	Samantha Johnson	Getting the most out of 'Scopus'
19 Apr 17	Prof Moses Mulumba	Uganda's experiences of improving maternal health with resource constrained settings: Examining the role of the law
3 May 17	Prof Jason Madan	Value-of-Information methods to inform research prioritisation and study design - can they be used in practice?
11 May 17	Prof Jeremy Wyatt	The evaluation of e-health initiatives
17 May 17	Prof Philip Burnet	Can Gut Bacteria Really Affect Brain Function? Studies with Prebiotics
24 May 17	Prof Sandra Eldridge	Pragmatic trials: what, when, how?
7 Jun 17	Prof Terrence Dwyer	The contribution of physical activity to mortality
14 Jun 17	Breakfast Seminar with Prof Rachelle Buchbinder	Using Healthcare Wisely: Reducing Inappropriate use of tests and Treatments
PhD Showcase 21 Jun 17	Mrs Hala Alhodaib Ms Nicola Brough	Mobile Applications for the Management of Diabetes Mellitus: A Systematic Review The Warwick Holistic Health Questionnaire. Designing and validating a patient reported out-come measure for Cranio-sacral Therapy (CST): A mixed methods study
28 Jun 17	Ms Katie Irgin	HEFCE Report - Recommendations for IMPACT

RCN RI Journal Club Papers - 2016/2017

Date	Title
6 Oct 16	McCrae, N and Pursell, E (2016) Is it really theoretical? A review of sampling in grounded theory studies in nursing journals. <i>Journal of Advanced Nursing</i> 72(10) , 2284-2293. doi:10.1111/jan12986
3 Nov 16	Malterud, K. et al (2016) Sample size in Qualitative Interview Studies: Guided by informational Power. <i>Qualitative Health Research</i> 26(13) 1753-1760
1 Dec 16	RCNRI Team Away Day - Strategy
31 Jan 17	Brennan, SE; McKenzie, JE; Turner, T; Redman, S; Makkar, S; Williamson, A; Haynes, A and Green, SE (2017) Development and validation of SEER (Seeking, Engaging with and Evaluating Research): a measure of policymakers' capacity to engage with and use research. <i>Health Res Policy Syst</i> 17:15(1):1 . doi: 10.1186/s12961-016-0162-8
2 Mar 17	Lim, WC; Black, N; Lamping, D; Rowan, K and Mays, N (2016) Conceptualizing and measuring health-related quality of life in critical care. <i>J Crit Care</i> 31(1):183-93 . doi: 10.1016/j.jcrc.2015.10.020
30 Mar 17	Parslow, RM; Shaw, A; Haywood, KL and Crawley, E (2017) Important factors to consider when treating children with chronic fatigue syndrome/myalgic encephalomyelitis (CFS/ME): perspectives of health professionals from specialist services. <i>BMC Pediatr</i> 1;17(1):43 doi: 10.1186/s12887-017-0799-7
4 May 17	Throsby, K and Evans, B (2013) 'Must I seize every opportunity?' Complicity, confrontation and the problem of researching (anti-) fatness, <i>Critical Public Health</i> 23:3 ,331-344, doi: 10.1080/09581596.2013.802290
8 Jun 17	McCann, S; Campbell, M and Entwistle, V (2013) Recruitment to clinical trials: a meta-ethnographic synthesis of studies of reasons for participation. <i>J Health Serv Res Policy</i> 18(4):233-41 . doi: 10.1177/1355819613483126

Qualitative and Mixed Methods Interest Group 2016-2017

Date	Title
Sept 16	Using focused team ethnography in primary care settings: A new approach for health services research (Dr Helen Atherton)
Nov 16	Research with children: The experiences of two research students (Marie Murphy and Sarah Mitchell)
Dec 16	Paper and pies: A year in review (Dr Stephanie Tierney and Dr Rebecca Johnson)
Feb 17	Digital methods: Attractions and shortcomings (Dr Stephanie Tierney)
Mar 17	Conducting public health research with and within local authorities: Reflections from four years of navigating the political landscape (Dr Shelina Visram)
Jun 17	The 6 steps to designing a successful Q-methodology research project (Dr Stephen Jeffares)
