Above - Warwick Medical School Reception
Director’s Message

We have had an excellent year, as Warwick Research in Nursing continues to thrive. The programme for our Research Centre is focused on research that is relevant to nursing and health care more broadly. We have gone from strength to strength, developing our research and producing high quality publications with real impact for patients, carers, health care professionals, policy makers and the public both nationally and internationally.

We’ve really enjoyed working with our talented PhD students and see them develop as they work on their thesis. It’s also rewarding to see them publish their research and move forward with research as a firm part of their future plans. We have developed a community of practice for supervisors within Warwick Research in Nursing, where we learn from each other and constantly strive to develop our doctoral supervision practices.

We enjoy being a key part of Warwick Medical School, maximising the benefits of being embedded within such an interdisciplinary school. We are very fortunate to work closely with a range of colleagues and collaborators, both within Warwick and nationally and internationally. We continue to work hard to generate external grant income and have been very successful.

We have been well supported by Warwick Medical School, and I would like to thank Professor Sudhesh Kumar, Dean; Professor Frances Griffiths, Head of Division and Professor Diane Playford, Head of Unit, for all their support and challenge. We look forward to working with our new Head of Division, Professor Paramjit Gill, and new Head of Unit, Professor Anne-Marie Slowther. I would also like to thank all the Warwick Research in Nursing members for their thoughtfulness, support, good humour and for their focus on research and its impact.

We are delighted to report that Dr Sophie Staniszewska has been promoted to Professor. Congratulations Sophie very well deserved. We said farewell to Dr Elizabeth Tutton, who has made major contributions to our research and culture over many years. We are delighted that she remains an honorary research fellow, and we look forward to continuing our close working relationship.

We have made major national and international contributions to our fields over the last 12 years, and look forward to continuing to produce leading edge, high quality research relevant to nursing that makes a difference.

Professor Kate Seers
Director, Warwick Research in Nursing.
July 2019
Summary of Progress 2018-2019

Ongoing Research
Warwick Research in Nursing (WRiN) is a Research Centre which focuses on understanding and improving care. We have four research themes: patient and public involvement; experiences of care; patient reported outcomes and translating knowledge into practice. We have leads for each theme and WRiN members work across themes. Our website has more details: https://warwick.ac.uk/fac/med/research/hscience/wrn/

Publications
The Warwick Research in Nursing team has been very productive over the past year. We have had 55 publications in 2018/2019. Our work remains highly cited, which is rewarding.

Grants
We have been successful in generating research grant income, with eight externally funded grants running during the period of this report. We continue to work collaboratively on grant applications nationally and internationally, and health professionals and users of services are important collaborators and colleagues on these grants.

Measures of Esteem
Members of Warwick Research in Nursing have a variety of measures of external esteem, including editors and editorial boards of journals, invited plenary lectures, invited national and international scientific committees, contribution to national policy initiatives and contribution to the academic community via external examining, especially at PhD level.

PhD Students
We have had an interesting year, with our PhD students making good progress. We have two more students who successfully completed their PhDs over this academic year, and two more about to submit. We have also had applications from international students for PhD supervision in WRiN.

Newsletter
Our newsletter continues to be published twice a year. It provides key messages from our activity and is disseminated widely as well as being on our website. We know it is read as we often get comments and requests for more details.

Contribution to the Academic Community
We contribute to the University in many ways. Professor Seers is co-lead for research in the Division of Health Sciences and a member of the Divisional Strategy Group. She also is leading on embedding mentorship and career development both within the Division and more widely across the Medical School. She is on the University’s Athena-SWAN working group, which successfully bid for an Institutional Silver award. She is co-deputy chair of the Capital Space and Amenities Group and a member of the Finance and General Purposes Committee. She co-founded and supports the Women’s Academic Network for the Medical School. She is a member of the Warwick Medical School Research Committee. She undertakes both a coaching & mentoring and a mediation role on behalf of the University. She is now academic lead for the University shadowing scheme which she initiated.

Professor Staniszewska is a member of the Impact Acceleration Committee, a member of the cross University Public Engagement Committee and the WMS representative on the UHCW PPI Strategy Group. Dr Haywood is a member of WMS’s Welfare Strategy group, she was co-lead of WMS’s Athena Swan working group which successfully submitted for a Silver award in April 2019. She is also lead for Athena Swan within the Division of Health Sciences. She is chair of the Gibbet Hill campus Health and Wellbeing Networking Group, and WMS representative on the University Equality and Diversity Committee.
founded and runs the division’s ‘C3’ monthly meetings - an informal networking opportunity for colleagues.

The Warwick Research in Nursing staff also contribute as supervisors of PhD students, members of MPhil to PhD upgrade panels, PhD exam advisors and internal examiners of PhDs. We also organise and contributed to research surgeries, journal clubs and Research and Development seminars.

We also benefit greatly from being part of the University of Warwick and Warwick Medical School. The University is world class, one of the UK’s leading research universities, with 87% of Warwick’s research ‘world-leading’ or ‘internationally excellent’. Warwick Research in Nursing staff can access an extensive programme of training and development within the University and a diverse programme of seminars and other lectures. There are also many opportunities for collaboration with colleagues from a variety of departments.

Leadership
We feel that creating a place where people want to come to work and where they can flourish is of fundamental importance. Respecting and valuing staff are key underpinning principles for us. We are committed to promoting leadership across all levels, and several staff have been on leadership courses to enable this to happen, this year Dr Haywood participated in the Aurora leadership development course. We believe that strong strategic leadership and mentoring underpins the effectiveness and culture of Warwick Research in Nursing.

Conclusion
Warwick Research in Nursing remains at the cutting edge of knowledge generation, undertaking research that is relevant to nursing and to health and social care more broadly. Our highly cited publications and our indicators of peer esteem suggest that our contributions are valued by a wide range of those external to the University. We are committed to continuing to develop research capacity that can underpin the development of nursing.
Publications 2018/2019

Professor Sophie Staniszewska - Lead for Theme A: Patient and Public Involvement (PPI) and Theme B: Experiences of Care

2019

2018

**Dr Liz Tutton (Honorary Research Fellow) - Contributing to Theme B: Experiences of Care**

2019

Tierney S, Tutton E, Seers K. I becomes we, but where is me? The unity–division paradox when caring for a relative with dementia: A qualitative study. Int J Older People Nurs. 2019;00:e12263. [https://doi.org/10.1111/opn.12263](https://doi.org/10.1111/opn.12263)

2018

David J. Keene, Sarah E. Lamb, Dipesh Mistry, Elizabeth Tutton, Ranjit Lall, Robert Handley, Keith Willett; for the Ankle Injury Management (AIM) Trial Collaborators. Three-Year Follow-up of a Trial of Close Contact Casting vs Surgery for Initial Treatment of Unstable Ankle Fractures in Older Adults *JAMA*. 2018;319(12):1274-1276. doi:10.1001/jama.2018.0811 [https://0-jamanetwork-com.pugwash.lib.warwick.ac.uk/searchresults?q=Keene%20ankle&allJournals=1&SearchSourceType=1&exPrm_qqq={!payloadDisMaxQParser%20pf=Tags%20qf=Tags^0.0000001%20payloadFields=Tags%20bf=}%22Keene%20ankle%22&exPrm_hl.q=Keene%20ankle](https://0-jamanetwork-com.pugwash.lib.warwick.ac.uk/searchresults?q=Keene%20ankle&allJournals=1&SearchSourceType=1&exPrm_qqq={!payloadDisMaxQParser%20pf=Tags%20qf=Tags^0.0000001%20payloadFields=Tags%20bf=}%22Keene%20ankle%22&exPrm_hl.q=Keene%20ankle)

Dr Kirstie Haywood - Lead for Theme C: Patient Reported Outcomes

2019

2018

**Professor Kate Seers – Lead for Theme D: Translating Knowledge into Practice and contributes to Theme B: Experiences of Care.**

Staff Development

Kate Seers

- Professional Virtues in Modern Medicine. One day workshop. November 2018
- Patient Values in Clinical Decision Making workshop, Warwick Business School April 2019
- Half day workshop on getting research used in Parliament and in Government. May 2019

Sophie Staniszewska

- Patient Values in Clinical Decision Making workshop, Warwick Business School April 2019
- Half day workshop on getting research used in Parliament and in Government. May 2019

Kirstie Haywood

- Half day workshop on getting research used in Parliament and in Government. May 2019

Vivien Nichols

- Good Clinical Practice refresher training February 2019
- Serious Adverse Event training September 2019
Key Peer Esteem

Kate Seers

- Invited workshop at British Pain Society on patient and public involvement in research. May 2019
- Elected Director European Nursing Research Foundation 2015, re-elected 2017.

Sophie Staniszewska

- Member of the NIHR PPI Impact Strategy Group
- 2019-current. Member of the NICVE Clinical Guidelines Expert Advisory Panel
- 2019-current. Member of the NIHR PPI in Global Health Virtual Advisory Group
- 2017-current. Founding member of the International PPI Network (in collaboration with NIHR, INVOLVE, Cochrane and COMET)
- 2017-2021 Member of Implementation Strategy Board, NICE. Key advisor on patient and public involvement in the implementation of NICE guidance.
- 2018-current Member of PiViN , NIHR NETSCC Public Panel
- 2017-current Member of NICE Expert Panel
  https://researchinvolvement.biomedcentral.com/

Kirstie Haywood

- Invited member (peer nomination) of the International Society for Quality of Life Research (ISOQOL) Board of Directors (2018-2021).
- Chair of the Patient Engagement Special Interest Group (ISOQOL) 2012-2018.
- Invited member of the American Heart Association (AHA) international writing group – to develop a Statement of Survival following Cardiac Arrest.
- Invited expert contributor to the AHA Core Outcome Set for Paediatrics initiative.
- Invited plenary lecture at:
  - 2018 European Resuscitation Council (ERC), Bologna, Italy.
  - 2019 Invited session chair and member of faculty at Post-resuscitation Care Conference IV. Lund, Sweden.
Route to Main Campus from Warwick Medical School
