

MBChB Student profile – Rebecca

I've just done the degree in Biomedical Science and I just graduated in July and I've moved over here from Northern Ireland.

Well I've always heard such great things about Warwick especially their anatomy teaching and whenever I came to the open day here, all the lecturers were just so lovely and so welcoming and so eager to answer questions and it really appealed to me that the graduate program could be done in four years, all of the patient contact and was exactly what I wanted so I knew that Warwick was going to be the place for me.

I think a lot of it is the lecturers that are so good that really aid our learning here. They're always so friendly and you can just go up and chat to them and ask them anything no matter if that is anatomy related or just questions in general and they're so eager to help you learn and get the most out of this learning experience and get you to be the best doctor you can be.
