19 The best features of this module were:

Respondent	Response
	Honestly, not much, in all honesty. The content that needed covering was covered.
	I really enjoyed the lectures, and the real life examples used. I found the explanations very clear and engaging.

Respondent	Response
	I think the content was very interesting and there were many examples and real-world applications used. I also liked the fact that you could see how much content there was going to be for each week so that you could plan ahead

20 Any particular aspects/items needing improvement (and suggestions how):

Respondent	Response
	The lecturer showed no enthusiasm on the subject. Throughout covering and learning the content of the module I am yet to understand the point of learning this content, how it is applicable and why we would ever need to do anything taught in this module. New terminology was not explained properly and was only understood when I took time away from the lectures to go onto Youtube and learn the content alone. This year I paid £9,250 for 120 CATS of already all-online content, meaning this module cost me in the ballpark of £580. Absurd.
	Not that I can think of.
	Sometimes I found that making notes on topics that were explained via a demonstration was a little bit challenging
	Powerpoint should never be used for teaching. It cannot show which materials are most important and the pacing will always be terrible.
