

## Survey Summary

### PX280 Feedback 2022

No. of Participants	36
Total no. of students	113
Survey Started	08 Mar 2022 14:12:27 GMT
Survey Ended	04 May 2022 15:57:36 BST

#### I attended (...?...) of the lectures

Description	Responses	%
<50%	3	8.33
50-80%	7	19.44
>80%	26	72.22
<b>Total</b>	<b>36</b>	

#### The quantity of course material was...

Description	Responses	%
About right	27	75.00
Too much	7	19.44
Too little	2	5.56
<b>Total</b>	<b>36</b>	

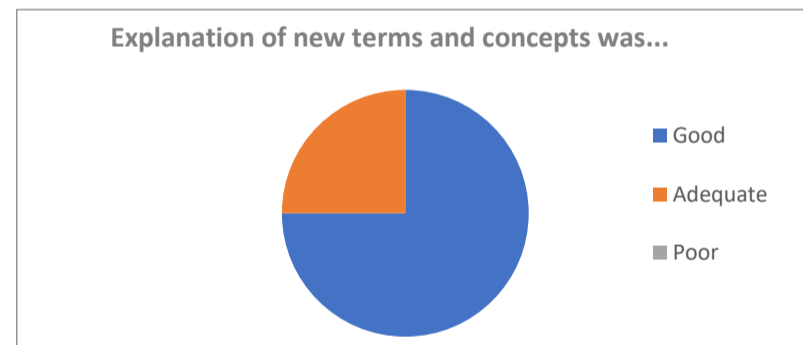

#### By the end of the module, its purpose and direction was...

Description	Responses	%
Clear	23	63.89
Hazy	11	30.56
Unclear	2	5.56
<b>Total</b>	<b>36</b>	

#### Explanation of new terms and concepts was...

Description	Responses	%
Good	27	75.00
Adequate	9	25.00
Poor	0	0.00
<b>Total</b>	<b>36</b>	

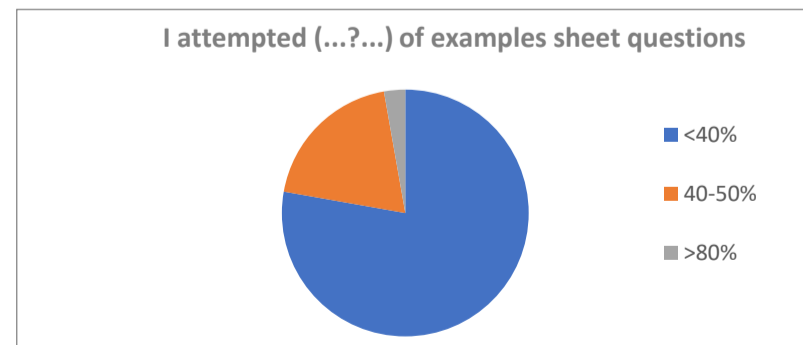

#### I have a (...?...) set of notes

Description	Responses	%
Good	23	63.89
Adequate	10	27.78
Poor	3	8.33
<b>Total</b>	<b>36</b>	

#### I attempted (...?...) of examples sheet questions

Description	Responses	%
<40%	28	77.78
40-50%	7	19.44
>80%	1	2.78
<b>Total</b>	<b>36</b>	

**The examples questions were...**

Description	Responses	%
Too easy	2	6.90
About right	23	79.31
Too difficult	4	13.79
<b>Total</b>	<b>29</b>	

**Promptness of feedback on coursework was...**

Description	Responses	%
Good	11	42.31
Adequate	13	50.00
Poor	2	7.69
<b>Total</b>	<b>26</b>	

**Would you like a course taking this subject further?**

Description	Responses	%
Yes	18	50.00
Neutral	12	33.33
No	6	16.67
<b>Total</b>	<b>36</b>	

**Did you use any of the recommended/suggested textbooks**

Description	Responses	%
Yes - purchased	1	2.78
Yes - consulted	6	16.67
No	29	80.56
<b>Total</b>	<b>36</b>	

**I found the textbooks used to be...**

Description	Responses	%
Very helpful	2	5.71
Helpful	4	11.43
Unhelpful	0	0.00
I did not use a textbook	29	82.86
<b>Total</b>	<b>35</b>	

**I understood the following main topics...**

**1. INTRODUCTION**

**(greenhouse effect and light absorption as a source of energy)**

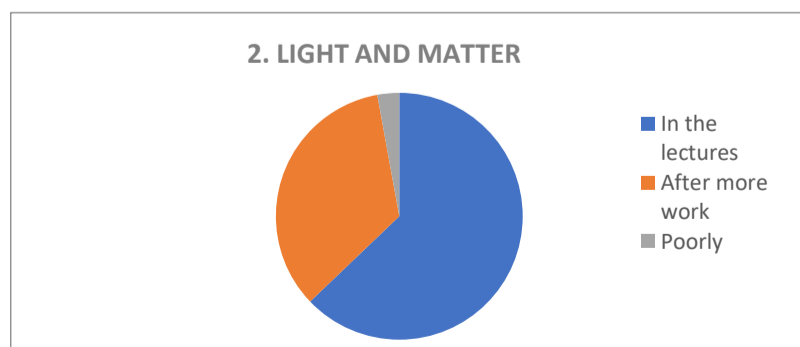

Description	Responses	%
In the lectures	29	80.56
After more work	6	16.67
Poorly	1	2.78
<b>Total</b>	<b>36</b>	

**2. LIGHT AND MATTER**

**(Black body radiation, Einstein coefficients, Beer-Lambert Law...)**

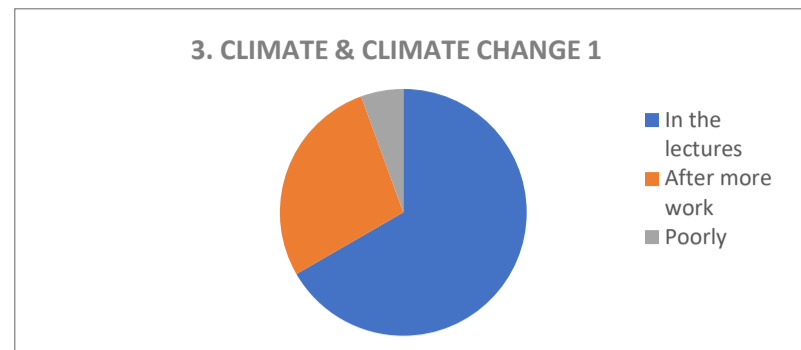

Description	Responses	%
In the lectures	22	62.86
After more work	12	34.29
Poorly	1	2.86
<b>Total</b>	<b>35</b>	

### 3. CLIMATE & CLIMATE CHANGE

(Vertical structure of atmosphere, radiation balance, dynamics...)

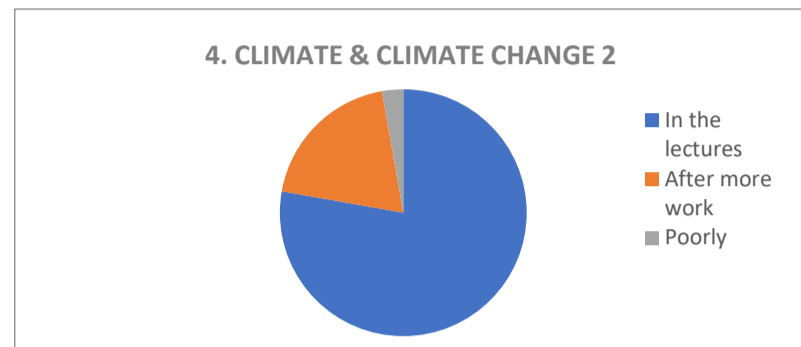

Description	Responses	%
In the lectures	24	66.67
After more work	10	27.78
Poorly	2	5.56
<b>Total</b>	<b>36</b>	

### 4. CLIMATE & CLIMATE CHANGE

(Forcings, feedbacks, carbon cycle, Are We Responsible?)

Description	Responses	%
In the lectures	28	77.78
After more work	7	19.44
Poorly	1	2.78
<b>Total</b>	<b>36</b>	

### What did you think of the following methods of delivery?...

#### 1. Notes handwritten during videos

Participants: 26

#### Comments:

Good, helpful

Easy to keep pace with, clearly presented

Michael's notes were clear and well written. Numbering equations definitely helps

Good, like notes & explanation

Handwriting can sometimes be unclear (but rarely illegible). It was well structured, it felt clear which parts were required to be remembered and which were background knowledge.

The handwritten notes were clear, and had complete explanations

Clear, made more difficult sections easier to understand. And allowed further work to be done later with a clear idea if what was done in the lecture.

Good

Useful and clear

Found it useful

Bit cramped and the adjustments made to equations after initially writing them down made it difficult to copy. Otherwise ok to follow.

Seems pretty comprehensive

Very good

Good

good

Needs to be more coherent

Too much writing that it wasn't clear what was important

A bit too fast but legible.

good

Poor during term 1

Good but lacked a little explanation

Good, clear and easy to follow. A good way to know that you have all the information you need in a clear way.

It works well

Good

Not enough

Handwritten notes often felt sparse, and material from the slides which could have been drawn out diagrammatically I feel should have been integrated into the handwritten notes to improve flow, even if they would have been more poorly drawn. This and the habit of referring to equations by number often makes the narrative thread of the lectures disjointed and more awkward to follow rather than just reiterating, restating or referring to previous parts by name.

#### 2. PowerPoints presented during videos

Participants: 27

#### Comments:

Not really as necessary for the 2nd term but helped further the understanding

Good and clear although sometimes didn't allow adequate time to right everything down

PowerPoints were alright. Good to see clear diagrams and graphs. Enjoyed the bird videos too

Prefer in person

It is nice to have actual figures to accompany the notes. This is a nice touch when the written notes refer to this

Clear, with good quality graphs. A little harder to take good notes about the slides

Easy to understand, helped with the written notes to make things clearer

Good with the handout

Useful for examples. It would be helpful to know which graphs we need to learn

Helpful to see notes and slides at the same time

Relevant

Before printed slides they didn't really seem too important  
 Referenced too heavily/ would prefer the handwritten notes to be more self-contained  
 Very useful with diagrams  
 Good  
 good  
 Want more printed  
 Pretty decent but bit waffle  
 Good.  
 great  
 Bad  
 Too much extra content  
 Good addition to handwritten notes.  
 Also good  
 Mediocre  
 would be better supporting more detailed material rather than a primary source.  
 The numbered slides were typically useful at least, but should have been used much more sparingly as they require more printing on the part of the student and tend to be flow-breakers. I have no problems with the parts which were all slides since they are very graph-heavy and would be hard to implement otherwise.

**3. Guided reading material**

---

**Participants:** 21

**Comments:**  
 Good to further understand  
 N/A  
 Didn't use it  
 Ok  
 Didn't read any  
 Did not use  
 Would like more  
 Have not used this yet  
 Can't read  
 Didn't really use it too much, may use more over Easter  
 Did not use  
 Didnt use any  
 Good  
 Yes  
 There was reading?  
 Ok  
 Haven't read yet  
 Good  
 Unsure  
 neutral  
 N/A

---

**The best features of this module were:**

**Participants:** 23

**Comments:**  
 Michael pounds, Birds and Chinese. Enjoyed the content as well a bit  
 Bird watching  
 Learning content that is very relevant to everyday life(Bird of the week)  
 organisation and delivery of in person lectures  
 Engagement provided from in person style  
 Discussion of climate sceptics, and how one might argue against them  
 Can't say, I enjoyed all parts of this module equally. Thank you!  
 The topic, and Michael is a very good lecturer  
 The bird videos  
 Birds  
 Section 1 and 2 had very clear goals; related content and link-backs made it very interesting  
 Verbal delivery  
 The little interval  
 Content  
 michael pounds  
 Michael Pounds  
 I liked the term 2 nuclear section  
 Chernobyl  
 Delivery was great  
 The breaks in the middle of the lectures  
 Michael Pounds and his birds  
 examples and figures to support theory, helped to apply and aid description  
 Immediate practical looks at the data underlying a topical political issue, something which is frequently missing from physics. It was also interesting to 'pull back the curtain' on the methods current climate scientists use to model and characterise climate behaviour.

---

**Any particular aspects/items needing improvement (and suggestions how):**

**Participants:** 17

**Comments:**

A typed set of notes would have been helpful

A lot of content!

Maybe a couple more worked examples, or looking at some past paper questions?

None

The same with all physics modules, it lacks context and the origin of what it is we're doing. Some things are just stated and I don't like that, I prefer deep understanding from the ground up

Maybe print the slides as a handout so people can have them with the notes

More birds please.

Section 3(Climate model, atmosphere, Climate change) could definitely be split up into more sections, as this section felt very hazy as to what the actual overarching idea was, something section 1 and 2 did not suffer from

Nope

None

maybe a problem class for the problem sheets so students feel more motivated to do it

Need coherent, centralised set of notes. Perhaps a pdf of everything you need to know.

More concise and links between lectures. I know this is a combination of modules but it felt like I was doing a new module every week.

More tangible

Slides used need more focus/link to the handwritten content better

more notes (either in lecture or provided separately)

As before: slide material which can be drawn out by hand should generally be integrated into the notes in order to improve flow.

Numbering equations rather than describing and reiterating them in my opinion reduces readability, and in my opinion should be

phased out. Political and socioeconomic drivers of continued greenhouse gas emissions could do with more discussion as frankly

climate change itself is a political issue, and any analysis which does not account for this incomplete.

**Any other comments:**

---

**Participants:**

10

**Comments:**

The breaks midway through lectures were brilliant

Thank you

Brilliant module, you (Michael Pounds) made it interesting and entertaining despite it being a bleak/potentially boring subject. Compared to our lecturer first term, you were very very good.

The phrase "what's a minus sign between friends" needs to be used more.

Nope

No

The breaks were nice

Make problem sheets assessed so that we actually have to use them during the course

As someone with anxiety and depression, and someone who has had 2 previous years worth of live-lectured content (due to temporary withdrawal), I dislike the jabs oriented at those using lecture capture. I vastly prefer hybrid learning as it allows me to take my time to highlight and format notes properly, as well as easily revisit things I haven't quite absorbed the first time around. It is not a moral failing of mine that I am not in good enough health to come in to lectures that I do not even benefit hugely from, and I am disappointed in the stigma this seems to attract within the physics department. Most of the students I knew who were using lecture capture were not homebodies using a laptop in bed. They were engaged with their course and going to the library as if it were a 9-5 job. It is not their fault that their engagement isn't immediately visible to you.

MODULE CODE PX280

YEAR 2022

**Please ensure that you hand this form back to the lecturer at the end of the lecture or bring the form back to the Student Office, Room P522 (within 2 working days). Thank you.**

Thank you for filling in the online survey. If you was not able to do complete the survey during today's lecture please visit the module's moodle page where you will find a link to the survey. The survey will stay open for a further week after the module ends.

Thank you for filling in the online survey. If you was not able to do complete the survey during today's lecture please visit the module's moodle page where you will find a link to the survey. The survey will stay open for a further week after the module ends.

We would appreciate your further written comments below.

**The best features of this module were:**

The lectures are delivered well and are kept interesting and understandable  
I always appreciate the short 5-minute breaks in the middle of each lecture.

**Any particular aspects/items needing improvement (and suggestions how):**

The in-person lectures are slightly harder to follow online as the white-board and pointer stick aren't recorded, so it can be confusing what it is being shown.

**Any other comments:**

The teaching was good  
I enjoyed the module so  
Have a nice haiku.
