Participants: 4

**Comments:**

Unclear sometimes what information is necessary and some content seemed rushed through.  
No  
The lectures were adequate. The only bad aspect is that he showed too many diagrams which can sometimes be overwhelming. I really liked the fact that he answered all the questions fast through email.  
This module has double the amount of content it should have for a 15 CAT module. 15 CAT modules should have 10 weeks worth of content. This module has 20 weeks worth of content, making it near impossible to revise everything before the exam.

**The best features of this module were:**

- Stellar evolution (it's just fascinating).
- The teaching was clearly for the subject itself rather than the exam.
- A good variety of topics were covered, and I liked the reminders of previous lectures and continual reminders of how each topic fits into the module and course as a whole.
- The lecturer was ~~very~~ quite engaging and very approachable

**Any particular aspects/items needing improvement (and suggestions how):**

- It was very power-point-heavy; it would have helped me process the information better if some of it was written down live (e.g. with the whiteboard or visualiser) especially for equations.  
This would also help to moderate the pace. There were lots of occasions when I was writing something important from the powerpoint, then the slide suddenly changed part way through.
  - The very last part felt slightly rushed, and the pace of the first few weeks were quite slow.
- Any other comments:**
- Overall very enjoyable, thank you.
