Some concepts were not explained thoroughly enough and too much knowledge was assumed in one or two places for my liking.

The handwriting and scan quality of the notes was appaling. I guess the actual content was adequate, but going through these lectures was very frustrating. I believe the lecturer should adopt the style of writing down the notes themselves as they speak during the lectures. This would make the lectures clearer and more enganging for the students.

Would have preferred for the notes to be written as he spoke, as I often had to pause the videos to catch up. Sometimes the quality of the image and handwriting of the notes made it hard to work out what was intended too.

	Respondent	Response
		The quality of the pictures of the hand-written notes was often very poor which made it challenging to read sometimes.
