Subject: Imagining the future: Warwick Physics 50th anniversary celebration day - 4th July 2015
Date: 18 May 2015 11:04
To:

PA

To all alumni, previous staff members and current staff and students of Warwick Physics,

The Physics Department invite you and your family to a **day of celebrations** on

Saturday 4th July 2015, starting at 9.00 with talks from 10.00, ending with a BBQ in the evening

to mark the **50th anniversary of the University and of the Physics department**. We hope a large number of our community will join us to listen to **talks by past, present and future leaders** of the department, to **tour the department and its facilities** - many newly improved, to see **physics demonstrations** and **outreach activities** and to catch up with fellow alumni, staff and students.

Further details and the programme for the day can be found here:

<http://www2.warwick.ac.uk/fac/sci/physics/intranet/50anniv/>

We are intending to **bury a time capsule** on the day and you can already make suggestions as to what to load it with at the web page. If you have **photos** of former times in Physics, you can now upload them onto the web page to be shared with others. Leave a message on our forum if you want to get in touch with specific people for the day, or just want to say "hi".

We are planning to have sessions where you can **catch up with fellow alumni and staff** from your decade. We are looking for **volunteers to facilitate** these sessions so please let us know if you can do this.

Registration is now open, along with a link to book B&B through Warwick Conferences, and the registration page can be found via the link provided above. Please register if you wish to attend, to help us with catering. Be careful to register via the page for staff and students (you will need to be logged in).

The day will **end with a BBQ** and, naturally, many **good memories**.

Any questions should be sent to: physics50@warwick.ac.uk

On behalf of the department, I am very much looking forward to welcoming you in July.

Professor Robin Ball
Head of Department
