Tin based artefacts
Aluminium based artefacts

- Recent bibliography on conservation of aluminium alloys artefacts (BROMEC 6)
- Conservation of aluminium alloys artefacts (BROMEC 7)
- Conservation of aircrafts – 2 case studies (BROMEC 9)
- Corrosion study of aluminium artefacts in an aeronautic collection: analysis and identification of corrosion risks (BROMEC 16)
- Aluchromy: an Art Painting Technique on Anodised Aluminium (BROMEC 17)
- Preservation of a DC-3 aircraft and the use of inhibitors (BROMEC 20)

Cleaning

- CO₂ cleaning method applied to metal objects from the Science Museum – XIX century Chemical Laboratory (BROMEC 17)
- Artefact analogues for investigating original surface limits and corrosion product removal techniques for the ferrous armour of the Knights of St John, Palace Armoury, Malta (BROMEC 22)
- Cleaning of sulphide on silver and gilt silver threads in silk textiles using laser in the UV- and visible range (BROMEC 22)
- Characterization of the interaction of laser radiation with copper alloys used in outdoor sculpture in the United Kingdom (BROMEC 22)
- Conservation approaches for monitoring and cleaning Ag and Ag-alloy artefacts (BROMEC 26)
- Functional character and restoration criteria: comparative research of cleaning on a liturgical cross (Vado-Cervera, Palencia, Spain) (BROMEC 26)

Composites

- Iron / waterlogged wood artefacts: microbiological and electrochemical study (BROMEC 3)

Publication in the next WOAM proceedings
Conservation research has started on the Civil War submarine H.L. Hunley (BROMEC 4)

Conservation issues around the Civil War Ironclad USS Monitor (BROMEC 5)

Corrosion Phenomena on a 17th century box of board games (BROMEC 7)

Analysis of ancient artefacts made of glass, enamel and metal (BROMEC 8)

The formation of a corrosion layer on paintings made with a copper support (BROMEC 9)

The effects of manufacturing techniques on the deterioration of paintings on copper (BROMEC 9)

The Nativity Triptych - an interdisciplinary project (BROMEC 11)

Problems in the conservation of firearms (BROMEC 11)
Metal threads in textiles - some case studies (BROMEC 15)

Study of the morphology and material of metal threads from Hispano-Moorish textiles (BROMEC 15)

New French research program on very long term corrosion in concrete (BROMEC 16)

Mercury in technical and industrial collections (BROMEC 16)

Condition survey and diagnostic of Max Mathews’ electronic violin at the Music Museum of Paris (BROMEC 20)

Methodology of study of mineralised organic remains. Application to the buried iron artefacts of the Middle Ages tomb of Bruckmühl, Germany (BROMEC 20)

The conservation issues of cleaning a 14th century eastern French water gilt, tin plated & silvered wooden box (BROMEC 20)

Technical research on metallic threads from the vestments of a 19th c. statue: research on the production technology and on the state of conservation (BROMEC 26)

Evidence for Roman metal glue (BROMEC 27)

Copper based artefacts

Plastiline as cause of “black spots” on bronzes (BROMEC 1)

Copper sulphide corrosion on copper based alloys and minerals (BROMEC 1 & 5)

Use of raman spectroscopy for the chemical identification of corrosion products produced by atmospheric corrosion of bronzes (BROMEC 1)

Curly Malachite (BROMEC 2)

Measurement of heavy metal run-off due to environmental corrosion (BROMEC 2)

The removal of bronze spray paint from a collection of Outdoor bronze monuments in the suburb of Athens (BROMEC 3)

Removal of chlorides from enamelled medallions (BROMEC 4)

A comparative study of protective coating systems for outdoor bronze sculpture in marine environment (BROMEC 5)

Study of Patinas formed on Cu base alloy Monuments after Outdoor exposure in Buenos Aires City (BROMEC 6)

Crespo, M., Cicelio, G and Rosales, B. (2004) Electrochemical characterisation of patina protectiveness evolution on outdoor bronze sculptures, in proceedings of the ICOM-CC Metal WG interim meeting, METAL 04, Canberra, 185-194
Corrosion Phenomena on a 17\textsuperscript{th} century box of board games (BROMEC 7)

EFESTUS: Tailored strategies for the conservation and restoration of archaeological value Cu-based artefacts from Mediterranean Countries (BROMEC 8)

Study and conservation of a selection of copper cast artefacts (BROMEC 8)

The thin copper-alloy fittings of small Roman and Merovingian wooden chests in the Römisch-Germanisches Museum Cologne (BROMEC 9)

“Golden altars” in Denmark (BROMEC 10)

Protection of copper based and common metal artwork by electropolymerisation of acrylic monomers (BROMEC 10)

Artistic bronzes: selection of alloys, protective evaluation using conventional and advanced techniques (BROMEC 11)

Chronopotentiometry of Archaeological Coins (BROMEC 13)

French-Chilean cooperation project for the conservation of sculptures in Santiago de Chile (BROMEC 13)

Patina management: the conservation and preservation of restored patina of outdoor bronze sculpture (BROMEC 13)

Environmental consequences and protection of outdoor bronze monuments in Greece (BROMEC 14)

Optimization of electrolytic stabilization of marine archaeological copper alloys (BROMEC 14)

Brass memorial grave plaques from Franconia and Thuringia dating from the 15\textsuperscript{th} to the 17\textsuperscript{th} century – an interdisciplinary study of the monumental inventory and its endangering through environmental influences (BROMEC 15)

Use of micro-Raman spectroscopy for the study of the atmospheric corrosion of copper alloys of cultural heritage (BROMEC 17)
Growth and properties of oxidation layers and of patinas at the surface of copper alloy objects of archaeological or artistic interest (BROMEC 17)

Corrosion and protection of bronzes covered with a patina: electrochemical and spectroscopic study of the surface of archaeological artefacts and synthesis of a similar patina on a commercial bronze (BROMEC 17)

The impact of different soils on the corrosion of copper-based artefacts and methods of their conservation (BROMEC 17)

Study of the corrosion protection of copper and its alloys applied to cultural heritage conservation (BROMEC 18)

Relationship between the conservation state of unearthed bronze artefacts and the burial environment (BROMEC 18)

Study of the corrosion of bronze Cu-8%Sn and the inhibiting effect of 3-phenyl-1,2,4-triazole-5-thione (BROMEC 19)

Corrosion inhibition of bronze with Opuntia ficus indica stem extract (BROMEC 19)

Late Bronze age copper ingots in the Central Mediterranean and the Lipari Hoard (BROMEC 19)

ATENA project: Advanced analytical techniques for the conservation of archaeological metallic and ceramic artefacts and the recovery of ancient manufacturing techniques (BROMEC 20)

EcoNET: Protection of bronze covered with patina by safe organic substances (BROMEC 20)

Microcrystalline waxes for the protection of copper based alloys exposed outdoor (BROMEC 20)

Restoration of two copper based basins from the Quend site (BROMEC 20)

Mylar, reproductions of the alloy, its patination and conservation decisions (BROMEC 20)

Electrochemical study of the influence of the Sn content on the formation of patina on Cu-Sn bronzes (BROMEC 21)
Characterization of the interaction of laser radiation with copper alloys used in outdoor sculpture in the United Kingdom (BROMEC 22)

Characterization of the alteration of copper based ethnographic artefacts (BROMEC 22)

In-situ time resolved monitoring of copper corrosion using an automated electrochemical cell (BROMEC 23)

Characterization of plating materials and techniques used in instruments of Sax factory (BROMEC 23)

Conservation and restoration of Goya’s engraving copperplates (BROMEC 24)

Patination nucleation on statuary bronze and brass (BROMEC 26)

Functional character and restoration criteria: comparative research of cleaning on a liturgical cross (BROMEC 26)

**Corrosion studies**

Plastiline as cause of “black spots” on bronzes (BROMEC 1)

Copper sulphide corrosion on copper based alloys and minerals (BROMEC 1 & 5)

Use of raman spectroscopy for the chemical identification of corrosion products produced by atmospheric corrosion of bronzes (BROMEC 1)

- Hayez, V., Utilisation de l'XPS et la corrosion atmosphérique, Surface and Interface Analysis, in ECASIA'03, submitted
BROMEC

Literature study of active corrosion phenomena on archaeological iron artefacts: definition of the active corrosion concept and characterisation of its symptoms (BROMEC 1)

Curly Malachite (BROMEC 2)

Measurement of heavy metal run-off due to environmental corrosion (BROMEC 2)

Corrosion Phenomena on a 17th century box of board games (BROMEC 7)

Examination of archaeological artefacts to assess the average corrosion rates and study the long term corrosion mechanisms of low carbon steel in soils (BROMEC 8)

Long term corrosion of iron, unalloyed or mild steel in clay soils. Physico-characterization and electrochemical study of archaeological models (BROMEC 9)

- Pons, E., Corrosion à long terme du fer et des aciers non ou faiblement allies dans les sols à dominante argileuse – Caractérisation physico-chimique et étude électrochimique d’analogues archéologiques, Université de Technologie de Compiègne, France, 2002, PhD Thesis.

- Pons, E. and al., Approche de la corrosion d’analogues ferréux par spectroscopie Raman, in Le Métal, Techné, n°18, 2003, 95-100

Monitoring the condition of archaeological artifacts and samples of experimental modern metals (BROMEC 10)

Artistic bronzes: selection of alloys, protective evaluation using conventional and advanced techniques (BROMEC 11)

The introduction of bioreduction in conservation: the removal of iron corrosion with bacteria (BROMEC 13)

Atmospheric corrosion : study of long term behaviour of iron through the analysis of archaeological artefacts. Part1: Role of phosphorus in the corrosion mechanisms (BROMEC 13)
Neff, D. and Balasubramaniam R., *Journal of History of Science* (accepted)

- Atmospheric corrosion: study of long term behaviour of iron through the analysis of archaeological artefacts. Part 2: Atmospheric corrosion mechanisms (BROMEC 13)

- Conservation, restoration and technology of medieval gilded metals (BROMEC 14)

- *PROMET* – Corrosion product cleaning of steel coupons: original surface conservation, aesthetic values and protective system efficiency (BROMEC 14)

- Impact of environmental conditions on the conservation of metal artefacts: an assessment based on electrochemical measurements (BROMEC 15)

- The investigation of deterioration and stabilisation of archaeological iron in the British Museum and experiments on effects of RH on corrosion of iron (BROMEC 16)

- Corrosion study of aluminium artefacts in an aeronautic collection: analysis and identification of corrosion risks (BROMEC 16)

- Corrosion characterization and treatment evaluations of iron artefacts recovered from the *USS Monitor* (BROMEC 16)

- Chlorinated phases on archaeological iron artefacts from terrestrial sites: characterization and formation mechanisms (BROMEC 16)

- New French research program on very long term corrosion in concrete (BROMEC 16)

- Mercury in technical and industrial collections (BROMEC 16)

- Use of micro-Raman spectroscopy for the study of the atmospheric corrosion of copper alloys of cultural heritage (BROMEC 17)

- Growth and properties of oxidation layers and of patinas at the surface of copper alloy objects of archaeological or artistic interest (BROMEC 17)

- Corrosion and protection of bronzes covered with a patina: electrochemical and spectroscopic study of the surface of archaeological artefacts and synthesis of a similar patina on a commercial bronze (BROMEC 17)

- The impact of different soils on the corrosion of copper-based artefacts and methods of their conservation (BROMEC 17)
BROMEC Abstracts per topics

- Low-oxygen and low-temperature storage of freshly excavated iron artefacts (BROMEC 17)

- Development of a method of interpretation of radiographies for the study of iron archaeological artefacts: contribution to the study of the corrosion structure and diagnosis (BROMEC 18)

- Study of the corrosion protection of copper and its alloys applied to cultural heritage conservation (BROMEC 18)

- Relationship between the conservation state of unearthed bronze artefacts and the burial environment (BROMEC 18)

- Study of the corrosion of bronze Cu-8%Sn and the inhibiting effect of 3-phenyl-1,2,4-triazole-5-thione (BROMEC 19)

- Corrosion inhibition of bronze with *Opuntia ficus indica* stem extract (BROMEC 19)

- Assessment of the environmental impact on the conservation of cultural heritage metal artefacts (BROMEC 20)

- Alteration of iron archaeomaterials: characterisation of chlorinated phases in terrestrial archaeological iron artefacts (BROMEC 20)

- Archaeological marine iron artefacts: from understanding the corrosion mechanisms to the prediction of the treatment times (BROMEC 20)

- A note on the detection of the original surface of marine wrought iron artefacts from observations made on marine crusts of the historic wreck, *Elizabeth and Mary* (1690), Anse aux Bouleaux, Québec (BROMEC 20)

- The use of sodium carboxylate as a corrosion inhibitor to protect iron artefacts (BROMEC 20)

- EcoNET: Protection of bronze covered with patina by safe organic substances (BROMEC 20)

- The maintenance of Cor-ten® sculptures (BROMEC 20)

Characterisation of corrosion layers formed during long-term exposure to atmospheric corrosion: application to the study of the reinforcing chain at Amiens cathedral (BROMEC 20)

Preservation of a DC-3 aircraft and the use of inhibitors (BROMEC 20)

Experimental iron at Fiskerton: results after burial for 30 months (BROMEC 21)

Deterioration of iron archaeological artefacts: local and structural investigations on Cl-containing corrosion products (BROMEC 21)

The effect of relative humidity (RH) on archaeological iron deterioration (BROMEC 21)

Effects of relative humidity (RH) on the corrosion of iron—an experimental view (BROMEC 21)

Natural corrosion inhibitors for the protection of metallic cultural heritage (BROMEC 21)

Electrochemical study of the influence of the Sn content on the formation of patina on Cu-Sn bronzes (BROMEC 21)

Characterization of the alteration of copper based ethnographic artefacts (BROMEC 22)

In-situ time resolved monitoring of copper corrosion using an automated electrochemical cell (BROMEC 23)

Long-term corrosion behaviour of low-carbon steel in anaerobic soils (BROMEC 25)

Patination nucleation on statuary bronze and brass (BROMEC 26)

Analytical study of lead came from historical stained glass windows of different chronology and provenance (BROMEC 26)

Poligen® ES91009 wax – a better metal coating than Paraloid® B72? (BROMEC 27)

Indoor atmospheric corrosion of historical ferrous alloys. System characterization (BROMEC 27)
Electrolytic techniques

Application of pulsed currents to the stabilisation of small iron artefacts (BROMEC 1)

Student dissertation, no publication

Electrolytic stabilisation of iron artefacts in neutral solution (BROMEC 2 & 3)

Iron / waterlogged wood artefacts: microbiological and electrochemical study (BROMEC 3)

Development of a course on the use of electrolytic techniques in metal conservation Iron based artefacts (BROMEC 3)

Development of a simple non-destructive method for the chemical characterisation of metal objects through corrosion potential measurements (BROMEC 4)

Paper for the next ICOM-CC triennial meeting (the Hague)

Comparison of galvanostatic and potentiostatic reduction for lead (BROMEC 5)

Just a proposal, no work achieved

Conservation of lead printing letters by electrolytic reduction (BROMEC 9)

Long term corrosion of iron, unalloyed or mild steel in clay soils. Physico-chemical characterization and electrochemical study of archaeological models (BROMEC 9)

Protection of copper based and common metal artwork by electropolymerisation of acrylic monomers (BROMEC 10)

The “$E_{corr}$ -Droplet” technique: a possible spot test for metal artefacts? (BROMEC 11)

Powerpoint presentation available on the Metal homepage of the ICOM-CC website (ETIC News 4)

Chronopotentiometry of Archaeological Coins (BROMEC 13)
The application of new technologies for the cleaning of archaeological and historical metal objects. Investigation of the possibility of applying laser technology and electrolytic methods (BROMEC 14)

Optimization of electrolytic stabilization of marine archaeological copper alloys (BROMEC 14)

Application of the EDT monitoring technique to assess the corrosion behaviour of certified copper based alloys in sodium sesquicarbonate and mineralised water (BROMEC 15)

Insights into the chemical and morphological changes of historical lead objects as a result of the use of electrolytic reduction as a stabilisation treatment (BROMEC 19)

Study of the corrosion of bronze Cu-8%Sn and the inhibiting effect of 3-phenyl-1,2,4-triazole-5-thione (BROMEC 19)

Corrosion inhibition of bronze with Opuntia ficus indica stem extract (BROMEC 19)

EcoNET: Protection of bronze covered with patina by safe organic substances (BROMEC 20)

In-situ electrochemical and SR-XRD time resolved study of lead carboxylate coating for the protection of cultural heritage artefacts (BROMEC 23)

In-situ time resolved monitoring of copper corrosion using an automated electrochemical cell (BROMEC 23)

SPAMT-Test: qualitative analysis of metallic elements on scientific, technical and clockmaking objects from $E_{corr}$ versus time plots: feasibility and limits of use (BROMEC 26)

Development of electrolytic treatment protocols to guide conservator-restorers’ choices (BROMEC 28)

Ethnographic objects

The conservation of historical Greek Porpi (Belt buckles) (BROMEC 3)

The conservation of ethnographic metal collections from the Eastern Mediterranean area (BROMEC 3)

Development of protection systems for ethnographic iron artifacts (BROMEC 6)
Industrial objects

- Mercury in technical and industrial collections (BROMEC 16)
- CONSIST: Coating Materials and Strategies for the Preservation of Iron / Steel Industrial Cultural Heritage (BROMEC 18)
- Conservation issues for mercury in technical and industrial heritage collections (BROMEC 20)
- Analysis and characterisation of alloys constituting the Dufaux 4 aircraft (BROMEC 26)

In-situ conservation

- In-situ conservation of grey cast iron cannon (BROMEC 1, 2 & 3)
- In-situ preservation of metal artefacts in a waterlogged environment (BROMEC 1)
- In-situ conservation of grey cast iron cannon (BROMEC 14)
- Assessment of the environmental impact on the conservation of cultural heritage metal artefacts (BROMEC 20)
- Archaeological marine iron artefacts: from understanding the corrosion mechanisms to the prediction of the treatment times (BROMEC 20)

Iron based artefacts

- Application of pulsed currents to the stabilisation of small iron artefacts (BROMEC 1)
  No publication, student dissertation
- In-situ conservation of grey cast iron cannon (BROMEC 1, 2 & 3)
  No publication, student dissertation
- D.C. mode hydrogen plasma treatment for archaeological iron (BROMEC 1)
  Research still in progress
- Investigation on the use of a Nd:YAG laser for the removal of corrosion products on archaeological iron (BROMEC 1)

Development of a method of interpretation of X-radiography pictures for the study of archaeological iron artefacts: contribution to the study of the corrosion layer and to the diagnosis (BROMEC 1)

Literature study of active corrosion phenomena on archaeological iron artefacts: definition of the active corrosion concept and characterisation of its symptoms (BROMEC 1 & 4)

Applying primer to iron objects using the vacuum painting technique (BROMEC 2)

Final year student report – unpublished

Investigation of chemical patination of iron (BROMEC 2)

Electrolytic stabilisation of iron artefacts in neutral solution (BROMEC 2)

Iron / waterlogged wood artefacts: microbiological and electrochemical study (BROMEC 3)

Protecting historical iron knives from persistent rust spots (BROMEC 3)

Presentation of a paper for the next ICOM-CC triennial meeting (the Hague)

Iron tin-plated finds (BROMEC 3)

Conservation research has started on the Civil War submarine H.L Hunley (BROMEC 4)

**Treatment of corroded painted iron surfaces with chelating reagents (BROMEC 4)**

**A new concept for the desalination of archaeological iron artefacts in neutral solutions (BROMEC 5)**

**Research into the stripping of corrosion layers on historical iron artefacts by acid under cathodic protection (BROMEC 5)**

**Changes occurring to archaeological iron in dry storage (BROMEC 5)**

**Research project that did not start**

**Post excavation changes to archaeological iron (BROMEC 5)**

**Published in the proceedings of the IRUG meeting, Florence, March 2003**

**Nickel enriched iron artefacts from Bohemia and Moravia (BROMEC 6)**

**New protection approaches for partly oxidised historic steel artefacts: Physical Vapour Deposition of inorganic and transparent films (BROMEC 6)**

**Presentation of a paper for the next ICOM-CC triennial meeting (the Hague)**

**Development of protection systems for ethnographic iron artifacts (BROMEC 6)**

**Conservation of burnt iron artefacts (BROMEC 6)**

**Research still in progress**

**Mass treatment of archaeological iron artefacts using alkaline sulphite (BROMEC 7)**

**Not published yet**

**Dissolution of iron corrosion layers by acid under cathodic protection (BROMEC 7)**
**Abstracts per topics**

- **Havlinova, A.** Investigation and restoration of iron sheets and decorative stars of the doors from the Pilgrimage Church of St. John of Nepomuk at Zelená Hora - Green Mountain (BROMEC 8)

- **Restoration of cultural heritage: stainless steel as an alternative** (BROMEC 8)

- **The Nottingham Galley cannon collection**: A proposed scientific inquiry into the reasons a conserved iron cannon dramatically cracked into pieces whilst in storage (BROMEC 8)

- **Examination of archaeological artefacts to assess the average corrosion rates and study the long term corrosion mechanisms of low carbon steel in soils** (BROMEC 8)

  - **Neff, D., Dillmann, P. and Béranger, G.** Apport des méthodes de microdiffraction et de microfluorescence X à l’étude de la corrosion à long terme des matériaux ferreux dans les sols argileux, 33èmes journées d'étude de la cinétique hétérogène, Compiègne 28 – 29 mars 2002 (oral communication).
- **Neff, D. and Dillmann, P.** Analyses de produits de corrosion formés sur des analogues archéologiques ferreux, Gestion à long terme des déchets nucléaires conference, CEA Saclay 13 – 15 mars 2002 (poster).

- **Neff, D., Dillmann, P., Descostes, M. and Beranger, G.** Corrosion of iron archaeological artefacts in soil-2: phase solubility and average corrosion rates, Corrosion science, submitted

Restoration and conservation of damascened steel weapons. A case study (BROMEC 8)

Development of a diagnostic method and a phenomenological scenario for the alteration of cultural iron materials exposed to atmospheric corrosion (BROMEC 8)

Thermal treatment of archaeological iron (BROMEC 8)

Long term corrosion of iron, unalloyed or mild steel in clay soils. Physico-characterization and electrochemical study of archaeological models (BROMEC 9)

* Metallographic examination of armour artefacts – an “in-situ” metallographic observation method (BROMEC 10)

* The armours of the Palace Armoury under synchrotron investigation (BROMEC 13)

/ Atmospheric corrosion : study of long term behaviour of iron through the analysis of archaeological artefacts. Part1: Role of phosphorus in the corrosion mechanisms (BROMEC 13)

**Neff, D.and Balasubramaniam R.,** Journal of History of Science (accepted)

Archaeological Heritage and conservation: application of new technological procedures to the restoration of ancient metals (BROMEC 14)

* PROMET – Corrosion product cleaning of steel coupons: original surface conservation, aesthetic values and protective system efficiency (BROMEC 14)

The investigation of deterioration and stabilisation of archaeological iron in the British Museum and experiments on effects of RH on corrosion of iron (BROMEC 16)
Corrosion characterization and treatment evaluations of iron artefacts recovered from the USS Monitor (BROMEC 16)

Chlorinated phases on archaeological iron artefacts from terrestrial sites: characterization and formation mechanisms (BROMEC 16)

New French research program on very long term corrosion in concrete (BROMEC 16)

Investigations into the alkaline sulphite treatment for conservation of large quantities of archaeological iron object (BROMEC 16)

Low-oxygen and low-temperature storage of freshly excavated iron artefacts (BROMEC 17)

Development of a method of interpretation of radiographies for the study of iron archaeological artefacts: contribution to the study of the corrosion structure and diagnosis (BROMEC 18)

CONSIST: Coating Materials and Strategies for the Preservation of Iron / Steel Industrial Cultural Heritage (BROMEC 18)

The desalination of archaeological iron objects with hydroxylamine (BROMEC 18)

Alteration of iron archaeomaterials: characterisation of chlorinated phases in terrestrial archaeological iron artefacts (BROMEC 20)

Archaeological marine iron artefacts: from understanding the corrosion mechanisms to the prediction of the treatment times (BROMEC 20)

Visualisation of tinning on archaeological iron based artefacts (BROMEC 20)

A note on the detection of the original surface of marine wrought iron artefacts from observations made on marine crusts of the historic wreck, Elizabeth and Mary (1690), Anse aux Bouleaux, Québec (BROMEC 20)
Fifteen years of marine archaeological iron artefact treatments: a critical review and new developments (BROMEC 20)

The use of sodium carboxylate as a corrosion inhibitor to protect iron artefacts (BROMEC 20)

The maintenance of Cor-ten® sculptures (BROMEC 20)

Characterisation of corrosion layers formed during long-term exposure to atmospheric corrosion: application to the study of the reinforcing chain at Amiens cathedral (BROMEC 20)

Conservation of two libation elements from Thugny Trugny (BROMEC 20)

Methodology of study of mineralised organic remains. Application to the buried iron artefacts of the Middle Ages tomb of Bruckmühl, Germany (BROMEC 20)

Experimental iron at Fiskerton: results after burial for 30 months (BROMEC 21)

Blue Iron Rust – A review on the formation and stability of vivianite (BROMEC 21)

Deterioration of iron archaeological artefacts: local and structural investigations on Cl-containing corrosion products (BROMEC 21)

The study, stabilization, and conservation of large iron elements recovered from the American Civil War ironclad USS Monitor (1862) (BROMEC 21)

The effect of relative humidity (RH) on archaeological iron deterioration (BROMEC 21)

Effects of relative humidity (RH) on the corrosion of iron–an experimental view (BROMEC 21)

Investigation into the potential of low-oxygen and dry/cold storage for freshly excavated iron artefacts (BROMEC 21)
Can dried out iron alloy artefacts be stabilized after 20 years of excavation? (BROMEC 21)

(Re)treatment of archaeological ironwork: necessary or just a waste of time? (BROMEC 21)

Alkaline sulfite desalination- tips and tricks (BROMEC 21)

Clemson University takes over Hunley Project (BROMEC 22)

A survey of past conservation methods on archaeological iron artefacts in Switzerland. The case study of iron objects recovered from La Tène site (NE) (BROMEC 22)

The use of iron in gothic architecture: the case of Troyes and Rouen churches (BROMEC 22)

Artefact analogues for investigating original surface limits and corrosion product removal techniques for the ferrous armour of the Knights of St John, Palace Armoury, Malta (BROMEC 22)

Programme ODéFA : Optimisation de la déchloruration des ferreux archéologiques (BROMEC 23)

Long-term corrosion behaviour of low-carbon steel in anaerobic soils (BROMEC 25)

Keep cool? Deep freeze storage of archaeological iron (BROMEC 25)

Ancient production techniques of Roman masked helmets from the 1st century A.D. (BROMEC 25)

Ferric surfaces of Pre-Roman weapons of the Iberian Peninsula: characterization, deterioration and treatment (BROMEC 27)

Indoor atmospheric corrosion of historical ferrous alloys. System characterization (BROMEC 27)

**Laser and metal artefacts**

Investigation on the use of a Nd:YAG laser for the removal of corrosion products on archaeological iron (BROMEC 1)

Use of multipulse Q- switched solid state lasers for art objects restoration (BROMEC 4)
No publication up to now

Laser Cleaning of Metal Surfaces (BROMEC 8)

Cleaning of metal artefacts using pulsed lasers (BROMEC 14)

The application of new technologies for the cleaning of archaeological and historical metal objects. Investigation of the possibility of applying laser technology and electrolytic methods (BROMEC 14)

Short pulse laser cleaning for heritage artefacts (BROMEC 19)

Characterization of the interaction of laser radiation with copper alloys used in outdoor sculpture in the United Kingdom (BROMEC 22)

Functional character and restoration criteria: comparative research of cleaning on a liturgical cross (Vado-Cervera, Palencia, Spain) (BROMEC 26)

MicroXRF spectrometry for evaluating laser cleaning procedures on ancient coins (BROMEC 27)

Lead based artefacts

Cleaning of aged protective layers covering lead artefacts damaged in corrosive organic acid vapours (BROMEC 1)

No publication. Student dissertation

Examination and stabilisation of a collection of lead medals from the National Museum of Finland (BROMEC 2 & 3)

No publication. Student dissertation

Archaeological lead artefacts: case study (BROMEC 3)

Lead roofs in Denmark (BROMEC 5)

Comparison of galvanostatic and potentiostatic reduction for lead (BROMEC 5)
No publication

- The problems associated to the past use of lead solder in the repair and restoration of golden objects (BROMEC 8)
- Adsorbent materials used to prevent alteration of metallic objects exposed in museums: the case of lead (BROMEC 9)
- Conservation of lead printing letters by electrolytic reduction (BROMEC 9)
- Insights into the chemical and morphological changes of historical lead objects as a result of the use of electrolytic reduction as a stabilisation treatment (BROMEC 19)
- Investigation of corroding lead inlays on Japanese lacquer objects (BROMEC 21)
- Historic printing block collection threatened by active lead corrosion (BROMEC 22)
- In-situ electrochemical and SR-XRD time resolved study of lead carboxylate coating for the protection of cultural heritage artefacts (BROMEC 23)
- Analytical study of lead cames from historical stained glass windows of different chronology and provenance (BROMEC 26)

Management of collections

- Metal objects in museums: experimentation and implementation of a conservation assessment and collections condition survey data file system on the armour collection of the “Palazzo Venezia” National Museum in Rome (BROMEC 8)
- Re-conservation and re-restoration of archaeological metal artefacts (BROMEC 9)
- PROMET - Innovative conservation approaches for monitoring and protecting ancient and historic metals collections from the Mediterranean Basin (BROMEC 12)

- PROMET: Innovative conservation approaches for monitoring and protecting ancient and historic metal collections from the Mediterranean (BROMEC 15)
PROMET - Developing new analytical techniques and materials for monitoring and protecting metal artefacts from the Mediterranean Region (BROMEC 16)

Corrosion study of aluminium artefacts in an aeronautic collection: analysis and identification of corrosion risks (BROMEC 16)

Investigations into the alkaline sulphite treatment for conservation of large quantities of archaeological iron object (BROMEC 16)

Assessment of the environmental impact on the conservation of cultural heritage metal artefacts (BROMEC 20)

Characterisation of Erard piano strings (BROMEC 23)

Cold climate conservation (BROMEC 26)

The PROMET project: development of innovative materials and techniques for the study and protection of metallic cultural heritage (BROMEC 26)

Ferric surfaces of Pre-Roman weapons of the Iberian Peninsula: characterization, deterioration and treatment (BROMEC 27)

**Non-destructive analysis**

Cost Action G8: Non-Destructive analysis and Testing of Museum Objects (BROMEC 7)

Original or fake? Investigation of a Bronze Age sword from Oedt in North-West Germany (BROMEC 27)

Proceedings of COST Action G8 meeting in Malta - 2005

EU-ARTECH project (BROMEC 12)

The armours of the Palace Armoury under synchrotron investigation (BROMEC 12)

Conservation, restoration and technology of medieval gilded metals (BROMEC 14)
Abstracts per topics

Development of a method of interpretation of radiographies for the study of iron archaeological artefacts: contribution to the study of the corrosion structure and diagnosis (BROMEC 18)

Physical and chemical characterization of metal archaeological artefacts (BROMEC 19)

Late Bronze age copper ingots in the Central Mediterranean and the Lipari Hoard (BROMEC 19)

Characterization of plating materials and techniques used in instruments of Sax factory (BROMEC 23)

Plasma in metal conservation

D.C. mode hydrogen plasma treatment for archaeological iron (BROMEC 1)

Plasma reduction, its use in metals conservation (BROMEC 5)

SMARTPLASMA project (BROMEC 12)

Archaeological Heritage and conservation: application of new technological procedures to the restoration of ancient metals (BROMEC 14)

Smartplasma project (BROMEC 21)

Sculptures

The removal of bronze spray paint from a collection of Outdoor bronze monuments in the suburb of Athens (BROMEC 3)

A comparative study of protective coating systems for outdoor bronze sculpture in marine environment (BROMEC 5)

Letardi, I. Trentin, G. Cutugno (Eds), Monumenti in bronzo all’aperto. Esperienze di conservazione a confronto, Nardini, Firenze, pp.113-118

Study of Patinas formed on Cu base alloy Monuments after Outdoor exposure in Buenos Aires City (BROMEC 6)

Crespo, M., Cicelio, G and Rosales, B. (2004) Electrochemical characterisation of patina protectiveness evolution on outdoor bronze sculptures, in proceedings of the ICOM-CC Metal WG interim meeting, METAL 04, Canberra, 185-194

Research on the bonding of metal structures into stone bases, i.e. for metallic sculptures (BROMEC 8)

Artistic bronzes: selection of alloys, protective evaluation using conventional and advanced techniques (BROMEC 11)

French-Chilean cooperation project for the conservation of sculptures in Santiago de Chile (BROMEC 13)

Patina management: the conservation and preservation of restored patina of outdoor bronze sculpture (BROMEC 13)

No publication yet

Environmental consequences and protection of outdoor bronze monuments in Greece (BROMEC 14)

Metal sculptures in the historic centre of Madrid: a review of their conservation and restoration (BROMEC 26)
Seminars

- 2002 ChimArt meetings (BROME 5)
- Translation of Metal 2003 abstracts (BROME 6)

Silver based artefacts

- The analysis of measles and a white blush on daguerreotypes (BROME 1)
- The conservation of historical Greek Porpi (Belt buckles) (BROME 3)
- Embrittlement of silver by lead on archaeological artefacts (BROME 5)
- Research into the possibilities for the removal of tin solders on silver artefacts (BROME 5)
- The analysis of measles and a white blush on daguerreotypes (BROME 1)

- Reduction of silver tarnishing and protection against further corrosion (BROME 8)

- Evesque M., Keddam M. & Takenouti H., 8th International Symposium on Electrochemical Methods in Corrosion Research, May 2003, Nieupoort (Belgium)

Research into the possibilities for the removal of tin solders on silver artefacts (BROMEC 8)

Anticorrosive protection of daguerreotypes (BROMEC 9)

The influence of lead on the embrittlement of silver alloys (BROMEC 13)

The influence of different cleaning agents and cleaning methods on the tarnishing rate of silver (BROMEC 13)

The restoration of jewellery (BROMEC 15)

Cleaning of sulphide on silver and gilt silver threads in silk textiles using laser in the UV- and visible range (BROMEC 22)

Ancient production techniques of Roman masked helmets from the 1st century A.D. (BROMEC 25)

Conservation approaches for monitoring and cleaning Ag and Ag-alloy artifacts (BROMEC 26)

Stabilisation

Application of pulsed currents to the stabilisation of small iron artefacts (BROMEC 1)

Electrolytic stabilisation of iron artefacts in neutral solution (BROMEC 2 & 3)

D.C. mode hydrogen plasma treatment for archaeological iron (BROMEC 1)

Electrolytic stabilisation of iron artefacts in neutral solution (BROMEC 2)

Comparison of quantitative methods of chloride measurement for metal conservation and desalination (BROMEC 4)

Conservation research has started on the Civil War submarine H.L. Hunley (BROMEC 4)

- **Removal of chlorides from enamelled medallions (BROMEC 4)**

- **A new concept for the desalination of archaeological iron artefacts in neutral solutions (BROMEC 5)**

- **The Nottingham Galley cannon collection: A proposed scientific inquiry into the reasons a conserved iron cannon dramatically cracked into pieces whilst in storage (BROMEC 8)**

- **The investigation of deterioration and stabilisation of archaeological iron in the British Museum and experiments on effects of RH on corrosion of iron (BROMEC 16)**

- **Corrosion characterization and treatment evaluations of iron artefacts recovered from the USS Monitor (BROMEC 16)**

- **Investigations into the alkaline sulphite treatment for conservation of large quantities of archaeological iron object (BROMEC 16)**

- **New approaches to iron stabilization research (BROMEC 17)**

- **The desalination of archaeological iron objects with hydroxylamine (BROMEC 18)**

- **Insights into the chemical and morphological changes of historical lead objects as a result of the use of electrolytic reduction as a stabilisation treatment (BROMEC 19)**

- **Conservation issues for mercury in technical and industrial heritage collections (BROMEC 20)**
Fifteen years of marine archaeological iron artefact treatments: a critical review and new developments (BROMEC 20)

Alkaline sulfite desalination- tips and tricks (BROMEC 21)

Clemson University takes over Hunley Project (BROMEC 22)

Historic printing block collection threatened by active lead corrosion (BROMEC 22)

Programme ODéFA : Optimisation de la déchloruration des ferreux archéologiques (BROMEC 23)

Tin based artefacts

Investigation of the composition of tin spoons found in Amsterdam (BROMEC 1)

COLLAPSE - Corrosion of Lead and Lead-Tin Alloys of Organ Pipes in Europe (BROMEC 5)

Research into the possibilities for the removal of tin solders on silver artefacts (BROMEC 8)

Restoration of a 17th century tin coffin (BROMEC 10)

Pewter objects in decorative arts – damages and their restoration (BROMEC 10)

Visualisation of tinning on archaeological iron based artefacts (BROMEC 20)
