Details for arrival

This is to let you know that some useful information for your arrival at the University of Warwick is now available on the conference website <http://ckm2010.warwick.ac.uk/> under "Location and Travel".

In particular, you may find the annotated map useful:

<http://www2.warwick.ac.uk/fac/sci/physics/research/epp/meetings/ckm2010/location/CKM2010-campus-map.pdf>

If arriving by train, the nearest mainline train station is Coventry (not Warwick!). From there the simplest way is by taxi, although there are also direct buses.

Birmingham airport is sufficiently close that it is possible to take a taxi directly from the airport to the University. Alternatively, go by train to Coventry, then go as above.

If arriving by car, you can park in car park 15. Note that access to the University from the A46 is closed due to roadworks (more details here). Diversions are in place to redirect all access via the A45.

If arriving during the day time, please come first of all to the conference reception, which will be located on the Science concourse. There will be a room in which you can leave baggage. Keys for your accommodation should be collected from the Rootes social building – if arriving outside normal working hours, please go directly there. The Rootes social building is also where all meals will be provided during the workshop (except for the conference dinner on Thursday 9th).

If you have to give instructions to a taxi driver, you can ask for "the physics department" if you want to go first to the meeting place (if they do not know where that is, either show them the map, or ask for "the gatehouse" -- number 22 on the map -- which should be manned by a guard who can then tell you where to go. If you want to go first to the accommodation, taxi drivers should understand "the Rootes social building", which is also the location they are most likely to understand as "the University of Warwick". Note that everything on campus is fairly close together, so unless you are carrying heavy baggage, you are unlikely to go badly wrong!

Don't hesitate to let me know if you have any questions (but please be patient if my reply is slow in coming).

Looking forward to welcoming you to Warwick.

Tim Gershon,
on behalf of the organising committees.
